<http://tiny.cc/b2tziw>

*"Look, this is not the time to waste your time investing in any company or diversifying your portfolio.  
You should have done this ten years ago.  
It is a time to continue to buy bullion no matter what the spot price is."*

- V

The following pages contain chronological emails sent since March 2012 from an anonymous European investment banker (he signs his emails with the initial "V") to a radio talk show host and author Steve Quayle regarding the European debt crisis, the predicted collapse of the Euro and its affect on the U.S. dollar. This informant has been sharing behind-the-scenes information on what insiders have been calling the "Spanish flu" / "Swine flu" along with his intel on:

- Portugal, Ireland, Italy, Greece, Spain (PIIGS)
- Euro / Eurozone crash/collapse/slowdown
- JP Morgan \$150B derivative trade loss
- \$200 - \$300T American derivative exposure
- Bank runs
- Solvency crisis
- Market crash
- Meltdown
- Silver & gold manipulation
- Electronic traded funds (ETFs)
- Western fractional reserve banking
- Bank holiday
- Credit default swap (CDS) exposure
- Liquidity crisis
- Brazil, Russia, India, China, South Africa (BRICS)
- Mining stocks
- Economic reset
- Capital controls
- Housing bubble
- Bank deposits
- U.S. debt
- Currency devaluation
- Currency war
- Trade war
- Precious metals
- Hyperinflation
- U.S. treasure bubble
- Commodities
- U.S. dollar collapse
- \$1Q Global derivative debt
- "Hacking" of European banks
- \$800T London Interbank Offered Rate (LIBOR) scandal
- Global Stealth Cyber Bank Run (GSCBR)

- MF Global
- PFG Best
- JP Morgan
- Hyperinflationary depression
- QE3
- Metals suppression
- October/November 2012 event
- Bank of America & Citigroup acquisition
- Morgan Stanley die-off
- Gauss virus
- Near Field Communication (NFC) smartphone payment system
- Singularity
- Seizure of European assets and infrastructure
- Global war
- Capital controls
- Depression
- Solvency crisis

He offers specific strategies to protect your money and investments from this crisis.

The expected Euro collapse will ultimately affect financial and economic conditions in the U.S. which is why you should pay particular attention to the information in these emails and take the appropriate action (sooner rather than later) to preserve your net worth.

The emails have been reproduced unedited and in their entirety. Because Steve's web site underwent a new design (8/1/12), the links to the older emails no longer work (i.e. V's emails prior to August 1, 2012 are not searchable on the new web site). Therefore, this PDF document contains the only known collection of all of V's emails since he began sending them.

This document will be updated as newer emails are published and can be downloaded from <http://tiny.cc/b2tziw>.

Any doubts to the existence of V (now also known as the Guerrilla Economist) were dispelled on January 11, 2013 when V himself went on talk radio for the first time. Since then he continues to make numerous radio appearances. This document also contains my notes from each radio show.

**To listen to V's radio talk show appearances, go here: <http://tiny.cc/37anyw>**

**For an action plan based on V's recommendations, go here: <http://tiny.cc/zgk4jw>**

Share this info with those you care about.

Loyalist

*"I will make it as clear for you as possible:

**Alert From European Investment Banker**

March 12, 2012

Steve,

I am someone who has worked for one of the largest investment banks in the world RBS and I can tell you that the contagion of debt has run its course. We are already prepped for a Greek default this month especially since the recent downgrade by Fitch.

I can tell you is this, watch the Eurozone carefully, even though Greece is the star, the UK and it's Financial power center "The City" is in a whole heap of trouble that is much worse than Greece or any of the PIIGS; France included. If Greece goes down this month, Legarde and Co are working laboriously but an uncooperative Greek public and a Situation beyond repair is not making it easy for the WB, IMF robber barons.

When the default happens you have about two maybe three weeks to get out of the dollar. After that it will be impossible.

Regards,

V.

**Greece in Receivership – Planned Financial Crash Date From Bank Insider**

April 12, 2012

Steve,

I write to you today to let you in on what some of the insiders at RBS, UBS, and Goldman Sachs already know. Greece has defaulted in secret. The strip mining of it's lands, wares, resources, and infrastructure has begun and is in fact final stages.

That is the reason that the current technocrat in power is a former operative at Goldman Sachs. Same goes for Italy. We have already begun the proceedings in secret to absorb more of Greek banking, along with PNB Paribas, SAG, and Satander. They will keep the Euro afloat as long as possible. Next action will be Italy and Spain before the full "public" MSM announcement of Greek default will be official. By then the same strip mining pillage/programs will have already begun finishing their work on the rest of PIIGS. Look for a Euro crash end of 2012 followed by Dollar Collapse two weeks later.

Look to see market slowdown the next few weeks. Plunge Protection team working overtime.

Regards,

V

## **Update From International Banking Source**

May 15, 2012

Steve,

The warning shots have begun. I will tell you that this week has been heavy in the financial world, as I predicted that it would be from my last update till the winter. The reverberations of the JP Morgan \$2 Billion dollar derivative trade loss is playing out and the fissures have finally begun to manifest on the foundations of the world market. What you will see in the next few weeks is continued talks and hearings about financial regulations and other such stall tactics. This is all a cover and a ruse. The \$2 billion dollar loss is just a smoke screen to further hide the truth of the \$2 billion loss from MF Global. Which I will tell you from my sources Jamie Dimon and JP Morgan Chase were the sole beneficiaries of that "Loss" . In truth JP Morgan has taken delivery and full liquidation of MF Global assets, thus the \$2 billion derivative loss is no big deal for the following reasons:

1- Americans and most MSM talking heads do not understand derivatives, thus it is easy to throw out cliches, axioms and jargon with cries for more regulations. Thus Dimon and his cronies at JPM know that they will skate free from all litigation. After all he was once again voted in as CEO by the JPM board. Why? Because he covered the loss of JPM trades with MF Global's "missing" \$2 billion. JPM knew about the derivative loss for months.

2- The \$2billion loss will cause the needed outcry from America's Banker (Dimon) to call for more power that will favor the Too Big To Fails (TBTF) Banks. This will allow them to further prop up the crumbling economy just long enough that it will allow them to further liquidate and conglomerate Americas wealth into fewer and fewer hands. All this before the coming Euro collapse which will occur this winter. This \$2billion JPM trade loss is the perfect catalyst needed by the MSM to keep the ruse and distraction going.

Greece has gone past the point of no return and RBS, UBS, Santander and SG are all implementing the final contingency plans for a Euro withdrawal and Drachma resurgence. This will occur very quickly creating hyper velocity and massive Euro bond dumps the likes of which we have never seen. The actions of Greece will inspire Austerity strapped Italy, Spain and Portugal to do the same. France will tailspin as the French have the greatest exposure to this coming crisis than any other nation in the Eurozone. Look for Francois Hollande to move for a Euro exit as well due to overwhelming pressure from his far left socialist party. Hollande has to comply, if he does not it would be political suicide.

Same goes for Germany, Merkel's party lost BIG in Germany's largest state North Rhine Westphalia (NRW), which way NRW goes, so goes the rest of Germany. Anti Euro sentiment is strong and it can not be stopped no matter what the bankers are doing.

The Euro is on it's last legs I do not see this currency continuing past 2013. There will be a quick dash to the dollar as a security blanket but that too will fail once the American derivative exposure can no longer be hidden. The final straw that will bring down this house of cards will be the \$200-\$300 Trillion of American derivative exposure. The derivative bubble will pop. What Dimon and JPM has signaled to the world elites and bankers in code is simply this...."It's time to get out of dodge."

Best Regards,  
V.

## **International Banking Source Update On Beginning Derivative Default And Huge JPM Loss**

May 29, 2012

Steve,

Here is the latest run down on JPM. They are stopping their share repurchasing for this very reason. You see their is a two front issue with JPM ; one, their naked shorting of the silver market which is well documented and two, their massive derivative exposure.

The derivative market that JPM plays in is the CDX.NA.IG.9, when factions within their London office (London Whale) made overly leveraged swaps, hedge funds smelled blood and so did a few banks. You see any moves that JPM does here on out exposes their weakness further. Which they can not afford any more exposure thus they are not buying back any more shares which is the equivalent of cutting an artery in a pool full of sharks. The strategy they are taking right now is to sit through the storm and ride it out as they can do nothing else for any action will make them even more vulnerable.They can not absorb hits in both JPM SLV and CDX.NA.IG.9. Inactivity is not something they want to do it is something they have to do. There is no other choice for them.

JPM is now in a panic as they are trying to unwind their losses without further signaling loss which will cause the other Big Banks like RBS, UBS, SocGen, PNB and Goldman Sachs will make at least \$500 billion each on JPM's position. They will do this by cooking the books.

Steve this is the truth, JW and others are right about the losses of JPM's position, the reality is...brace yourself, the loss is over \$150 billion!!! That is from the \$100 billion loss in CDX and the \$50 billion in other over-leveraged bets against it.

Massive is an understatement. The Fed and Dimon is working overtime to cover up the fissure, they can keep the sharade going for only so long. Many were looking for the collapse to begin in the derivative market, this is the sign everyone has been looking for, again...BRACE YOURSELF.

Regards,

V.

**Acceleration Of Financial Meltdown Can't Be Stopped /  
From International Banker Friend**

May 31, 2012

Steve,

The Iron boot has been firmly planted to the pedal of this runaway tractor trailer that is heading off the cliff. All of the Euro banks including my former associates at the Royal Bank of Scotland (RBS) are all prepped and ready for the Euro collapse. What we in the inside are calling "Spanish Flue" is now running hot with temperatures that are setting ten year yields sky high. What many do not realize is that Bankia's demise has started a breach in all the firewalls and safety measures that are in place in the Eurozone. This had an immediate effect on the Italian markets as you can now see the pandemonium that is there.

We keep hearing reports of massive bank runs that are occurring across many of the PIIGS but is not just limited to them. As I stated many times the UK and France are the most vulnerable to the Eurozone collapse, many of their populace are cashing out of their equities though there is a massive media blackout about this. European contacts report that there is a flight to German bonds, UK and a mass migration to the US dollar. But these currency life preserver jumps will not help as the contagion in all FIAT markets are affected. It is a game of hot potato that the investors are playing, jumping from one asset to the next and again before the one that they just jumped to burns. A juggling act with fire that cannot be quenched. Gold jumped over \$40, it is telling us something.

Many banks in the Eurozone are stuffed with US Bonds/TBills as a hedge, this will not work for them for the following reasons:

1- The American TBTFs (Too Big to Fails) are filled to the brim with T-Bills, so are many banks in the Eurozone, the backroom deal was take the bills, bolster your balance sheets, dont sell them and We (Federal Reserve) will help you out. Why do you think the details of a Fed bailout of Eurobanks were never fully divulged? It is because they are being propped up by any means possible including American Treasuries that can not be dumped.

2- They cannot dump them, the main reason is that the Fed is THE # 1 buyer of American Debt. Yes that is correct #1 not #2 we have surpassed the Chinese, since the ChiComs did not show for many of the last bond auctions and are stealth dumping US Debt Obligations. This has caused the balancing act to begin...Fed is Printing, at the same time buying what it prints, thus the banks can't lend causing a solvency crisis the likes of which we have not seen and killing all credit markets like a ELE (Extinction Level Event) This will create a hyper Velocity Parabolic crash.

There is no stopping this...We are still on track as I have been predicting for a while now for a fall/winter collapse of the Eurozone and naked exposure of all derivative markets the world over. Europeans will go through a major reset, after time they will recover as Europeans do not carry the type of personal debt that Americans do. It is for America that I worry. Look for these signs next:

1- JPM will be bailed out again but it will not stop the coming market crash. More details will emerge about their derivative swap failure \$150 billion and counting.

2-BOA (BAC Bank of America) will fold and be absorbed into JPM as a way to prop up the bleeding Giant. JPM will get the best picking of this deal just like they got with Bear Stearns.

3- Massive layoffs at Citigroup and Wells Fargo

4- Goldman Sachs finally pays the piper, look for massive cuts there as well as BIG Losses

5- Bond market bust which leads to freeze of all bond sales

6- Derivative bust the next one will be BOA followed by Citigroup

7- All CDS shorts and swaps will freeze.

8- Total Meltdown

Those who are ready begin to implement GOOD (Get Out Of Dodge) Plan. Keep what you need in paper and what you can afford to lose in banks in order to pay day to day expenses/bills. The rest of your investments/retirements should NOW be pulled from the market and moved to safe haven assets like Precious metals, farmland, fire arms and food. Prepare to ride out what we are calling the coming RESET BUTTON.

GodSpeed,

V.

**Financial Alert From International Banker-  
My Discussion With Him This Morning**

June 7, 2012

**SQ:** What are you hearing on the cartel's breaking point on silver manipulation and when do you think it ends.

**V's answer:** As the Euro collapses whether this summer or fall, I think there will be a complete stop to silver and gold manipulation for the following reasons: 2 weeks is all that is needed for the Euro collapse to lay bare the dollar deception. At this point all (interest rate swaps) will cease, derivative swaps will implode and the truth of US dollar safe harbor will go up in flames.

When this occurs the ETF (paper markets) will reflect whatever the trading price is at point of market collapse. This price point level will be held as it would take a further 2 more weeks to liquidate all silver and gold in repository vaults. In other words, the insiders will receive their deliveries, Joe Investor (paper trader) will be told his physical SLV GLD are all lost.

Once chaos ensues and all ETF markets are shut you will see a price hyper shot of all physical silver and gold. See how this whole entire (market manipulation scheme) hinges on the Eurozone and how deeply important a Euro collapse is for the world in general. Western fractional reserve banking is finished. Look for manipulation end in 6 months.

**SQ:** What are you hearing on the Amero and what about the gold-backed Chinese Yuan?

**V's answer:** The Amero is dead in the water and China will back their Yuan with gold.

**Email #7**

[http://stevequayle.com/News.alert/12\\_Money/120611.bank.update.html](http://stevequayle.com/News.alert/12_Money/120611.bank.update.html)

<http://tiny.cc/hrnufw>

**Alert From International Banker-This Is Huge**

June 11, 2012

Steve,

Steve tell your listeners to ignore ETFs and continue buying Physical SILVER and GOLD no matter what "spot price" is. Please tell them to take cash out NOW!!!! Only keep in bank what you can afford to lose and what you need to pay bills and expenses. Please tell them to get money out NOW!!! They have till December the latest to do so. Be mindful it CAN HAPPEN SOONER. Prices of Metals without manipulation \$1000 SILVER \$5000 GOLD---Steve Great show Im listening to you right now.

Here is the latest truth on Spain. The bailout already happened by stealth from very reliable sources. My sources are never wrong. The Bank holiday is going to spill over to Spain, Portugal and France. The Flight to safe harbor now is the UK. From there you will see flights to the US dollar. The main players have moved to Gold. Watch for another shock to SLV and GLD market. This will cause shaky uncommitted hands to dump more SLV and GLD physical. ETF markets will take massive hit.

Germany will start to have massive upheaval as their banks Duetche Bank in particular is over exposed to Spanish Flue, solvency crunch will hit Germany, look for Germans to go mad over the fact they can not have access to their funds.

Evolving..... Dollar only rises with IR Swaps and flight to "safe currency" once derivative market bursts all of this goes parabolic high velocity crash. This is due to the fact that the dollar is exposed as WORTHLESS due to the overleveraged CDS exposure. Very little SILVER left to be mined. It is a precious and Strategic metal. SILVER will be less plentiful than GOLD. Steve Russian economy will suffer greatly due to EuroCollapse. This is due to the dependency that the Russian economy has with Euro zone energy exports. (GAZPROM) Greek crisis has hurt Russian Natural Gas exports.

Russians are angry at Eurocrats due to their inability to fix the crisis. They are blaming the whole entire western banking system for the recent decline of the Ruble. Steve some of the investors that lost big in Iceland were the Russians and guess what? They are vested in Greece as well. Take to account this along side with recent NATO aggression does not work to help this particular situation. Steve remember Deutsche Bank is #2 only to PNB Paribas the French Banking Giant. The kicker here is that both of their derivative exposure combined is over \$125 Trillion!!! You have to be solvent in order to be liquid. This is a solvency crisis. The average joe on the street is duped into thinking it's liquidity. There is no liquidity. Chinese will back Yuan with Gold. They are stealth dumping US T bonds. Have not been in any major bond auctions for the last year or so. Will form new banking/ trade system with BRICS---Morgan Stanley is next Lehman bros due to Facebook and Euro exposure. Close all equity accounts and exit markets now. V

[http://stevequayle.com/News.alert/12\\_Money/120612.jackal.days.summer.html](http://stevequayle.com/News.alert/12_Money/120612.jackal.days.summer.html)

<http://tiny.cc/epnufw>

# The Jackal Days Of Summer

June 12, 2012

Quick question -SR- your banking source says to get out of the markets now. Would he group miners and gold shares (not ETF's) into the same category as other equities? Bob Chapman (who sadly just passed) has always maintained that miners are a different animal given that they have metal reserves both in and above ground. Just wondering if your contact agrees with that.

Great Question,

V's-- ANSWER --Mining stocks can be a great investment but one has to look at the pros and cons. I advise to stay clear of "Junior" mining companies. Most are either in Green or Brown exploration meaning they are either investing in new areas for potential ore or digging in areas that are already been explored. I do not like Junior companies as most are mismanaged and ill funded money pits. I can tell you this as I worked as a trader for Ameropa many years ago dealing in Cobalt and other strategic metals so I know quite a bit about mining. That being said even the Big ones are vulnerable as they are dependent on global economic growth. There are no major BIG company that only digs for Gold or Silver. They are looking for all different types of Metals/ minerals, strategic as well as industrial. It is the young and inexperienced Junior companies that go looking for the latest precious metal mine....AND LOSING BIG.

If I were to buy mining stocks I would place my money in the following companies:

- BHP Billiton (The Biggest)
- Rio Tinto
- NMDC
- Barrick
- Suncor

But the question is why do you want to waste your money on these companies as they too will be affected by the economic collapse/slowdown. Look this is not the time to waste your time investing in any company or diversifying your portfolio. You should have done this ten years ago. It is a time to continue to buy bullion no matter what the spot price is. Also if you do not know how to play the options market then I would stay clear all together. If you are savvy with options then I would short the stocks on the following companies that I just listed by taking out options contracts on all of them. This way you have the least amount of risk/ exposure and much to gain when the companies flop in the coming economic reset.

Again I will warn, if you are not a pro with the stock market with sizeable money to invest I would not bother wasting time with any mining company. Buy physical gold and silver and take possession now. The heat will not be the only thing that many will feel this summer it will be the global economy melting down. The Big Boys have already cashed out of the Euro and the dollar it is now high time for the Jackals to finish the dying body of the Western banking system off.

This summer you will see the Spanish flu run rampant through the PIIGS, In fact many of us on the inside are now jokingly calling it *Swine flu*. More bank failures are ahead and you will see the first German or French bank subsidiary failure this summer. This failure will be like a cancer amputated limb that will bring down the larger parent company and cause further panic in all markets. I am looking at you PNB Paribas and Deutsche Bank.

As the Jackals put out their last minute moves to cause the final fool's rally this summer, look for more flight to the dollar and another hit in the SLV and GLD funds. It's going to be a very hot summer in deed.

<http://tiny.cc/zulwfw>

## **Euro Has Collapsed!**

June 14, 2012

Steve,

It is with trepidation that I write to you....The Euro has collapsed unofficially. The money is OUT of Greece, Spain, Portugal, Ireland, Italy, France, Belgium and the German Elites have begun to shore up their wealth in hard assets and precious metals. RBS has given orders to close two of their major equities sectors, thousands of jobs are going to be lost the next few days/weeks. Credit Sussie has called on top investors to head to Swiss safe harbor and hard asset diversified portfolios.

The Capital Controls are in place to keep the charade of control going for the next four to six months before the official collapse. Steve...this is it. The Euro has collapsed and no one has noticed it. Greek bank runs are close to \$3.5 Billion Euros per day not the \$1 Billion that is being reported. The rest of the PIIGS are in the same boat. Bank Holiday imminent in all of continental Europe in the coming days and weeks. This is again theatrics to keep the plebeians believing in some semblance of control.

Please warn your listeners to pull out of their bank accounts everything that they need. Keep only to pay the day to day expenses. If they have land to go to, please do so now. Steve I do not know how much longer I can keep writing to you. You were knocked off line during your show with the Haggmans right before your were going to divulge what I have told you with the Spanish bailout. It is getting dangerous for all of now.

Again the Euro has collapsed...I repeat the Euro has collapsed. Unofficially.

May God Help Us All....

## V's Response To Greek Election Facade-Just Watch And See--The Euro Is Cest Fini

June 18, 2012

Steve also please tell them to [reread my posts](#). I have said that there is the unofficial collapse, this is from real inside sources. The official collapse is still going to be in the fall winter season of 2012. The Euro has a no confidence vote from all the big money players. They are all cashed out. In a 21st century Fiat system the big players will always cash out and hedge bets for the continuing slide in assets and equities that we are currently seeing sans the ridiculous "magical" DOW that stays above 12K thanks to the PPT and insiders.

Steve the irrational will jump the gun and give you flack when they read what they want to read and not fully read what has been clearly laid out. Tell them to get the financial houses in order and watch the events unfold. They have to understand that they have been treated to very intimate high level information from the top international banking sources. I vow on all that is true that the Euro is done, it has unofficially collapsed in the eyes of the elites. The foregoing theatrics are for the masses to indulge. When you have all the major banks lose their credit ratings, when you have capital controls in place, when you have unemployment rates over 50%, when you have bank runs, bank holidays, continued anarchy, my friend you have a collapse.

Even though the Syriza party lost, Steve your listeners should understand that it simply means more time time for the mid level guys to put the finishing touches on the Greece carcass. Look for vote fraud in the coming days. The people in Greece see a Euro exit as the only option for which their country will survive. We are on schedule with everything that I have said and posted. The Euro is a collapsed currency with no value to it amongst the elites. Once the mid level players are done you will see the "OFFICIAL COLLAPSE" take place within four to six months. This is done.

Steve here is the REALITY for any doubters:

All the top firms including the ones that I have worked for have all advised our top clientele to pull out their liquid assets.

All the top firms and banks have already prepped and ready for Euro collapse two years ago.

Elites have pulled out of the Euro

The Fed has implemented safe guards to euro exposure. In other words no further help for Eurozone

Bank runs not just by people...but by multinational corporations pulling out billions per day.

PNB Paribas and Deutsche Bank in shareholder meetings have declared Greece a failed state and Euro dead

The Swiss have drawn up a plan for Euro collapse two years ago all capital controls in place now were planned then.

All major Euro banks credit downgrades including Dutch, UK next

Like I said so many times, Greece is a symptom, it will spread, Spain will run hot with fever and burn a feverish death, This contagion is not just Greece. The spin masters are trying to get everyone focused on a silly election that means nothing when the real hard numbers tell the truth. This is not about one small nation in the south of Europe. This is about the whole entire Eurozone. I am giving your readers information that is six months ahead of the curb. Look for a market spike this week then followed by a shock and then a hit to the SLV and GLD ETF... Everything is moving on schedule nothing has changed. Prepare, Prepare, Prepare.

## **Alert From JP Morgan Employee - V Is Right!**

June 19, 2012

As for V: He is Right on!

Thank God for your contacts Steve, and thank you for all the time you put in trying to warn us, it is appreciated very much. V obviously works for a major firm dealing with all the frills of the elite, I work for JPMorgan and will tell you my Bank is positioning itself to be the MAIN SERVICER of Mortgages and financial transactions when the crunch begins. I alerted Bob Chapman a while back about this plan, he concurred with me as well. Every person who holds a mortgage will make their payment to the Federal Reserve, not Fannie or Freddie or FHA/VA/Ginnie...none of them. They will have their mortgages EFT'd (electronically taken out) out of their account. People will not have the choice to send in their checks or walk into a branch to make their payment, it will be tied to their accounts and they will have their pay garnished if they break that EFT contract. The same with a car when getting a loan, but that's another beast for a different day. I wanted to piggy-back V's intel and share JP's positioning of being made God Father through this financial crisis. V is right!!!!

Several months ago we had a District Manager in the Sacramento Valley visit branches to inspect Safety deposit boxes and brief the managers of an emergency order by the Bank to close branches in case of an emergency, all the doors would have to be shut and what employees would have to do when the banking holiday occurs, I found out through a Loan Officer who called me paranoid, she said she saw the memo, however I've been trying to get a copy of it but she has been unsuccessful, none the less, those of us in the know don't need any memos, the Holy Spirit is our guide and He teaches us all things, amen!

Steve, my Wife , my Son and I are interceding for you and your family, as well as the other Ministries you are asking for.

Thank you and God bless you, keep up the great work my Brother!

# Financial Time Bombs

June 21, 2012

Steve, where do I begin? Lets start up with the Eurozone and take it from there. I was the first to mention to you that the Spanish Bailout had already happened before it was even announced that they were going to need more within the week. Well a week has passed and it said that both Italy and Spain need an almost \$1 Trillion dollar bailout. The reason? Apart from both being insolvent, Italy has to borrow money at 7% to lend to Spain at 3% by edict of the Euro Technocrats via ECB. These morons have the economics understanding of a five year old. Now both countries are heading the way of Greece, which is total economic death as Greece is a failed state, with no government, a stolen election and thousands starving to death.

Steve as I said the Euro is unofficially collapsed with a major "OFFICIAL" collapse coming this fall or winter. I said many times to my cohorts , though the Eurozone has it's problems, it is the US that is the Supreme Emperor with No Clothes the Eurozone are just vassals. The problems facing the US are much, much worse. With very high unemployment, debt to the stratosphere and an economy in rigor mortis, the US is a patient on his death bed waiting for the elite power brokers to give it it's last rights and then devour the patient's body.

Couple of points that, I need to revisit for your readers and listeners are as follows:

1. Real Estate- The real estate, in the US, has in no way hit the bottom--yet. Not in the FEH (Financial Economics Hubs) like New York but I tell you that you will see a housing market crash the likes of which you have never seen or will ever see again. This will occur for the following reasons.

a) Inventory- The government backed mortgage programs (Fannie and Freddie), the left over sub-prime mess, and the foreclosures have left a massive \$7 Trillion dollar inventory of over 20 million homes the exact number of which have no idea and some even estimate it to be over 30 million not counting shadow inventory. Anyway to put things in perspective consider this. Numbers like millions, billions and trillions are tossed around the media so much that Americans have no concept of such insanely large numbers I will put it to you this way. In Ireland they have an inventory of 290,000 homes. This would take the Irish Fourty Three years to fill. How long do you think it would take the US if we use the "official" number of 18 million empty homes? It would take over 300 years!!!!

Knowing this, the power con men in the government and banking institutions have purposely tightened the spigot and bottlenecked the whole system preventing the market from adjusting and continuing the housing bubble for the not to distant future. They know if they opened that valve, it would dump a massive inventory of houses on the market crashing everything with it. A hit the US economy can't take. Why do you think "Robo Signing" was set up? In our Real Estate Banking divisions we purposely created Robo Signing, knowing full well that the muck that that would cause in terms of title holder and legal proceedings will keep the spigot tight until the Banksters got what they needed out of the market. Remember it's all about squeezing that one more dime out of the system one more percentage rate, one more profit margin and then when the very marrow is sucked from the bones the whole thing can then just turn to dust.

2. Deposit of Creditors- You know there still are savers in America, though not as much as their counterparts in other western nations but thankfully there still are. The reality is Steve much of what Americans save went last them more than a month at most in fact most American are two pay checks away from being homeless. Any way the vast amount of deposits in US banks allow them to play the fractional reserve game and thanks to the end of Glass Stiegel it allows them to take your hard earned money in your account and use it to make bets and play in the world investment markets. So long as you the American public dont demand your money at the same time (Bank Run) the banksters whittle it away like drunk sailors at a Rio bar. With the Fed continuing to print and buy US debt, this game is coming soon to a close. That is why I have warned, to only keep in your accounts what you can stand to lose and what you need to cover day to day expenses. How many of you have listened?

3. Sovereigns Debt - I have been screaming about this Frankenstein since 2007. I wrote an extensive report on the dangers of US bonds and TARP and how that would be the final nail in the coffin. We all know that there is a bubble in the US bond market. Heck we knew it for years. In my 2010 report I made it clear that the very thing that would bring down the US bond market would be the devaluation of currency (which is happening) followed by a currency war (which is happening) followed by a trade war (which has started) and then finally a rise in the precious metals market, particularly SILVER. When the US finally loses it's World Reserve Currency status (which is happening) Expect the US crash to make the Eurozone to look like a Sunday School Picnic.

All the problems in the US can be centered around these three major issues and when these financial bombs explode the shockwave will be immense. Alas I fear the banksters have a war planned for us as well, how do I know? The numbers tell me so.

## Hyperinflation, Deflation And Currency Wars

**SQ NOTE: Currency wars lead to shooting wars!**

June 22, 2012

As I write this to you we are circling a deflationary drain that has put the squeeze into aggregate demand levels (total demand for goods and services) and driven down the aggregate asset prices (real estate) So in order to keep the USS Titanic of sinking any further the privately owned and unconstitutional Federal Reserve has turned on the magic printing press in the hopes of "stimulating" and propping up assets by Quantative Easing (AKA "QE" which is a fancy way of saying printing money out of thin air.)

Helicopter Ben Bernanke (Look up why they call him "helicopter Ben" in order to appreciate the humor.) and the Reserve gum shoes are terrified of the US economic death spiral that has begun. Lack of liquidity, leading to lower consumption, leading to lower prices, leading to the whole economy grinding to a halt! So to prevent this the Fed has gone on a buying spree if you will, propping up one floundering asset after the next , buoying asset prices to prevent a deflationary dive, and injecting liquidity into the system to keep the magicians parlor tricks going. I would always say "when your only tool is a hammer, every problem becomes a nail."

Think about it, over the last few months the Fed has bought over \$2.3 Trillion of US treasuries, it has injected more and more "stimulus" but still we can not overcome this credit contraction. This is what happens when a nation demonizes it's labor force by outsourcing, swallows the Bovine Excrement of "Consumer Economy" and relegates its once manufacturing might as something that is old hat and primitive. In other words the Globalist and Multinational Banks and Corporations have sold us a bad bag of goods via our "elected" leaders.

This brings us to HYPERINFLATION.

Now the economically aloof will say that it is a far off prospect, a better chance that the polar ice caps will melt in a "global cooling event". I mean what most people would say is that with wages being driven down the way that they are, asset prices more or less stable, and credit market shrinking, hyperinflation sounds like some far off pipe dream of sycophantic doomsayer survivalist. Inflation is unlikely let alone hyperinflation. After all what most would argue is that deflation is the more likely candidate to run The United States of Ruin as the alternative is pure ridiculous. I am not an economist, I am though an avid, and I must say an astute student of history; and what history has taught me in the over 5000 years of human economic activity is this: Hyperinflation and inflation are and can be mutually exclusive.

What do I mean by that? Well in both cases of inflation and hyperinflation the currency losses it's buying power. I'll put it to you this way; inflation is when an economy overheats, it's a demand driven phenomena in which a nations consumables (goods& services) are in great demand due to overabundance of credit that it drives the cost of the consumables to skyrocket causing goods and services producers to raise prices in order to keep up.

Hyperinflation is not like that. It is the total and complete loss of faith and buying power of a currency. Prices rise not because someone wants to be paid more for goods or services that they provide, or more money for their labor or commodity,prices rise because they want to get out of the currency, they do not want it any longer, they want less of it and are willing to pay a healthy some for any hedge against it.

Lets face the facts here. This government's debt is 100% of GDP and the bloodletting has no end in sight. With a yearly fiscal budget shortfall of about 10% the Fed is purchasing TREASURIES in order to cover the shortfall on the government balance sheet. Thus they are fulfilling two objectives; one, help the government maintain aggregate supply levels (price of goods and services) and two, support asset prices in order to prevent any further deflationary erosion ( Like Realestate). So in the Feds calculations if you stabilize aggregate supply levels and prevent erosion of assets values you in turn would create an economic recovery, right?! WRONG!!!

Now follow closely to what I am about to say. We have never recovered from the September 2008 crash. All this talk about a "double dip" is a moot point as we never clawed our way from the first dip. The economy is as it has been for the last two years; heading down, no matter what all the talking heads on radio and TV say. For you see in trying to perform the same techniques which were applied with the crash of 1929 and 1933; the Fed has exhausted its cache of stimulus tools. They have done nothing and they have nothing left. After pumping trillions into stimulus plans, and trillions to improve balance sheets of the "Too Big to Fail" banks they have accomplished one thing; they have UNDERMINED TREASURIES!!!

Treasuries are the very threads that is holding this economy together and now these policies have metamorphosed them into the NEW AND IMPROVED TOXIC ASSET!!! Every world economy knows that they are overvalued, they know that their yields are mediocre and still no one in the main stream talking head shows ever rails against or even exposes them. The whole world cart blanche walks on eggshells around treasuries as if it were a Financial Nuke with a trip wire trigger and a timer. A bomb if you will....which IT IS.

History shows us a pattern when and how this financial Hiroshima goes off. It begins like this:

There will be a slight and sudden rise in a price of a necessary commodity like Oil

This will send tremors through the treasury yields, Treasury Mangers will sell off their allocations and go into the commodity (e.g. Oil) in order to grab a profit. I guarantee that they will sell treasuries as it's the primary asset that many of them can sell.

This will trigger the Fed to step in and buy the dumped Treasuries as they are trying to stave off deflation by keeping low yields and cheaply funded. (Quantative Easing) The Fed knows that the Bond Market senses a "Treasury Bubble" and once again they turn on the printing press to buy every treasury in sight to calm the markets and create asset price stability

The Zombie "Too Big to Fail" Banksters smell blood in the water and begin to dump their obscene amount of treasury notes. You see these living dead institutions were never nationalized but got the best parts of nationalization; total liquidity (stimulus money) and easing of accounting and regulatory rules. The flip side was the Fed required that they purchase US treasuries. You see buying up of the treasuries allowed their balance sheets to look well funded and monetized, all the while hiding the toxic assets that were being siphoned off their books by the Fed since 2008.

The Panic sets in...Asset managers are not stupid they know the US is in much worse shape than Greece. They know that there is a "Treasury Bubble". So when these mangers see the mass buying of treasuries by the Fed, and the mass dumping by the Zombie Banks, it will be their signal to get out of Dodge!!!

The Zombie To Big To Fails and Asset Managers that have dumped their toxic treasuries will look for a place to park their new found cash. Now where might you think they can put all that new cash into? COMMODITIES. Commodities of all types will shoot to the moon. From precious and industrial metals, Oil, food staples will all skyrocket in price, catching the American public with their pants down. Commodities will be the only safe haven to go to and this is when the American public will get it's first taste of hyperinflation and it will taste like gasoline when the price of oil surges passed \$150 a barrel in one week equating to \$10 a gallon gas!!!

Commodities SOARS and DOLLAR COLLAPSE ensues. The sell off of assets in purchase of commodities will be ballistic. People will unload homes, cars, personal belongings all once thought important for real assets like Gold, Silver, Food, Weapons, and Oil. In hyperinflation your \$400,000 house will be worth \$60,000 or 70 pieces of silver, for your house will not be able to help you buy things you need, while a commodity like gold and silver can.

Most of all the government can't stop it.

## II. Currency Wars

Another front is brewing in this mass pandemonium that is hurling toward us in thunderous fashion. That is the currency war that is beginning to heat up. You see during the 90's America went through it's dot com boom primarily off the money that it borrowed from the Chinese and other foreign investors. So when the dot coms became the dot bombs, and when that bubble burst the banksters at wall street and the financial mafia running the Fed needed fresh meat. After all the Chinese will be not so willing to throw their money into another tech stock venture with the US. at that time Alan Greenspan cut interest rates down to an unheard of 1% and eased bank lending. Thus in turn creating the housing bubble that was one sub-prime needle away from being popped. Now while all this was transpiring many political hacks and think tanks in the "District of Criminals" were beginning to complain that the Chinese were not allowing their currency the Yuan to float, that the Chicomps were artificially keeping it's value low. In turn creating a very large trade surplus for them, and a large trade deficit for us.

If you have been following the news lately, you would have been hearing the vast levels of complaining within the Anglo-American financial houses, the vast monetary disparity with the Chinese Yuan and even the Euro. In fact it is my opinion that this summers Euro collapse was a orchestrated act of financial warfare perpetrated by the British and American banking interests. That I will leave for another time. It is comedic that many in positions of power feel that it is the Chinese that is to blame for the economic dearth that we are facing. Now the madmen are sensing that the Wall street Casino may be closing, and in a last ditch play to make profits, and grab power. The overlords at the Fed and the Banksters on Wallstreet are in a race to the bottom. Devaluing the dollar as some sick way of kick starting the make believe economy. Hoping that a devalued dollar will make us more competitive in trade.

One thing that I will tell you is that in a currency war no one is a winner. Von Mises the famous Austrian economist that invented the Austrian school of economics said it best when he said that the way to destroy your middle class is to devalue your currency.

Back prior to 1913 and the creation of the creature that we now know as the Federal Reserve, a country's currency was essentially it's stock. A nation that produced, and sold it's good and wares had a very strong currency affording it's citizens a very good quality of life. Gold was the anchor that tied the majority of nations currencies back then, preventing the creation of economic bubbles, guaranteeing the stability of sound economic policies and power of wealth in the hands if the citizen.

Today money printed out of thin air and backed up by nothing is the order of the day. As we traverse into the current state of affairs, history has once again proven that fiat (by edict) currencies and central banks are failures. By engaging the Chinese, Japanese and Europeans in a currency war, a race to the bottom will do nothing but destroy us and what is left of our middle class. By trying to hit cheap Chinese goods with a tariff will incense the Chinese even more. This is not something that you want to do, especially since they are still the largest holders of your debt.

## **Financial False Flag: Beware Heads Up – Emergency Update**

June 27, 2012

Right now banking systems the world over are going into meltdown due to this global syphoning hack that is occurring in over 60 banks worldwide with untold losses in the billions of dollars and counting.

What I want all of you to know is this. It is DAMN impossible for any one hacking group or individual to pull this off. The sheer speed and scope of the operation as well as the precision through which it is being carried out leads me to believe an advanced source is at play.

Look you can not simply hack this many accounts in this many banks simultaneously without leaving any tracks and yet there are no tracks left behind just a bunch of dead end false leads that lead no where.

My sources have told me that the algorithm used in this operation is very very advanced and "they have never seen anything like this." This leads me to one conclusion. A false flag, an inside job designed as a pretext to a broader event. I have been warning about a financial collapse for some time, I have also warned of an impending bank holiday as well as the market indicators pointing to World War Three. I strongly believe this event would be used in any one of these ways.

All of our banking software has back doors built into them for the anonymous power brokers/masters to use as they deem fit. This is an inside job that is done by an International Banking/ Intelligence Agency conglomerate. Only they would have the accessibility, the infrastructure and means to pull this off.

I fear this is a huge prelude to a massive event. I have told many of you through this web site to get your money out...What are you waiting for?

Prepare,

V.

## **What's Really Going On In The Multi-Billion Dollar Bank Hacking World**

June 28, 2012

Steve, I am appalled that they (the media) truly are downplaying this mass hack. I spoke to my guy again this morning @ 7am NY time and he feels the number of banks affected could be over 200 but is confident that for sure 100 banks got hit. Another thing that the media is doing right now is damage control saying that the hacks took a year to do. This is nonsense as the hacks are recent and the money missing from the large accounts would be noticed a lot sooner than a year.

He also stated that the program is NOT Spyeeye or Zeus. He stated those they can stop with no problem as they do not have the source code and structure to hit that many servers at that short amount of time. Will keep you posted on the latest.

V.

SQ NOTE: DO AN INTERNET SEARCH ON "PROMIS SOFTWARE" AND SEE WHO STOLE IT FROM WHOM-THE MAINSTREAM MEDIA IS CONTROLLING THE DIS\_INFORMATION AT A FANTASY LEVEL-- SEEK GOD WITH ALL YOUR HEART AND ASK HIM TO REVEAL TO YOU WHAT'S REALLY TAKING PLACE.

## **Financial Webs Of Deceit. The Worlds Financial Market Is Undergoing Total Collapse**

July 6, 2012

It has begun the unofficial collapse of the Euro that I have announced back in late June has started to run into the massive canyon like fissures of the financial world. As web site after web site and expert after expert talk endlessly about the failing frame work of the whole western financial system; they over look one main point. That point is this; when a patient is brain dead, you may debate that there is still blood coursing through their veins, that their heart still beats, that there is still a modicum of respiration still occurring. The fact remains though the vestigial systems of the organism works, it's main source of control that dictates every one of its voluntary mechanical operation IS DEAD. So it is with Western Banking. There are still "signs" of life, the ATMs work (for most anyway) online transactions are for the most part operational (again for most) but the arguments of liquidity and solvency rage because of the simple lack of omission that the very needed rudiments of the financial system, it's modus operandi, it' s organized brain of safeguards and cognition has ceased functioning.

The Unofficial Euro collapse has hastened the hemorrhaging of various sectors around the financial world. Lets start with a few shall we.

Derivatives- I have documented that the real loss of JPM's previous London trade debacle is not the purported initial \$2billion or the now admitted \$9 billion but \$150 billion total loss. This coming from a Zombie Bank that recieves 77% of its profits from the government trough. The IR Swaps that are played in this field is astronomical and is accounting for more than 85% of all derivative trades. So what does this mean? I stated many times, when people have asked me, "what is THE SIGN of a financial collapse?" I have always said that it will begin in the derivative market first. After all we have an unsustainable world wide derivative debt that is in the Quadrillions. \$1.4 Quadrillion by most estimates. What does this mean and how will it play out?

Hacking- The supposed "hacking" that is occurring in over 60 banks at the same time is nothing more than those with the funds moving their assets out. It is a smoke screen, a diversion, a silent stealth bank run by the elites. Why all of a sudden there is total media black out? The funds that have been taken have crossed in to the billions of dollars. The total stealth bank runs are closer to 200 banks.

LIBOR- All over the news you hear the mother of all scandals, the fact that all the major multinational banks have been rigging the interest rate system and keeping it artificially low. Which robs you of your dividends and annihilates your savings but profiteers the banksters in their risky gamble with your money. They profit and you are left holding the bag. The banks involved in this LIBOR mess total 200 about the same that just so happen to be the same banks that are all of a sudden being "hacked" and are having "glitches". This LIBOR scandal puts into risk an \$800 trillion market made up of savings, investments, mortgages, loans and retirement accounts. Taking a sledgehammer to the confidence of the whole entire global market and western backed banking system. I laugh at these pundits who talk about the LIBOR. You see my friends there is no oversight over LIBOR, it's just a bunch of crooks deciding what they will charge for lending amongst themselves and how they can profit off of you. LIBOR was invented to be MANIPULATED the very design of this screams so. You have to wonder why now all of a sudden LIBOR is an issue? Read on.

So what does it all mean? Simple really my friends. The whole entire western banking system is being flushed out, the whole house is being purposely burned to the ground in order to make way for the new. If you are still in paper you are a madman or woman. Pull your money out now while you still have time. I will make it as clear for you as possible, your wealth, your way of life and your posterity's future is being PURGED, FLUSHED, BURNED OUT. The order of things are about to change officially. Watch the dollar, get out of paper, get into metals. You have been warned....Again.

V

[http://stevequayle.com/News.alert/12\\_Money/120610.LIBOR.bomb.html](http://stevequayle.com/News.alert/12_Money/120610.LIBOR.bomb.html)

<http://tiny.cc/arp8gw>

## **LIBOR Bomb**

July 10, 2012

The recent theatrics in the media about the LIBOR forgets to underscore the BIG picture. It is not the "BIG BANKS" or the Central Banks that is the problem. It is the cabal of financiers and the system that they have propagated for hundreds of years in the Western World and almost hundred years here in the US , that is the main parasitic cancerous growth. It is this growth that has been brooding in the veins of the financial system. Year after year, decade after decade, regulation after regulation, until one day the growth of this creature goes parabolic bringing sudden death to it's host. I think many of you have no idea about how much your lives are about to change, in a drastic way for the worst. What they have planned for you, you will wish to die. There is no making peace with the system, for this system makes no peace and it yields no quarter, no room for surrender. It's actions will be swift and the more you lay off putting things in order in your life the more you pay for your procrastination and normalcy bias with a fine so weighty you will wish you were dead. The LIBOR plays out like this and I will not repeat myself on what I have already said about it. Another crack/fissure in the derivatives market. I can not stress enough to tell you how close to breaking this market is. For those who do not understand the critical nature of this market and it's inevitable downfall, I can tell you this. It will be world ending in scope. I mean what I said. The Hacks that are occurring in over 200 banks and their servers around the world is the Global Stealth Cyber Bank Run (GSCBR). It is the elites way of finishing off your wealth. The last touches before the carcass is burned to a hearth. The Bond market is finished, We all knew that there is a bubble in the bond market, This is the coup de grace that will not pop the bubble, but make it explode with the force of a thousand suns. America will be broke and barren in a blink of an eye! These are two events that I have been warning about are ones that will end your life on this planet as you know it. Your cash will be worthless, your country at a standstill, No money, No food, no essential services, AND WHEN IT ALL STOPS..... YOU STOP.

[http://stevequayle.com/News.alert/12\\_Money/120612.the.hit.html](http://stevequayle.com/News.alert/12_Money/120612.the.hit.html)

<http://tiny.cc/zzfchw>

## Here Comes The Hit

July 12, 2012

What do you think was the main purpose behind the aptly named MF Global? What do you think is the connection to PFG Best? Why is JPM connected to both commodity houses? Simple....this is how you start the metals beat down that I have been screaming about for the past two years. It struck me this afternoon and after doing some digging and making a few calls, the answer stood right in front of me.

When MF Global went bust over \$2 billion in customer funds magically vanished. What happened next? Gold and Silver took a hit. Now PFG Best magically loses \$250 million, what happened next? The Gold market took 1.3% dive.

The kicker is this...both failed firms both have money sitting in whose account? Why JP Morgan of course and who are they the clearing bank for? Why the good ol boys at the Federal Reserve. Now what does the Fed and JPM have in common? Well among many things, the abject manipulation in the Gold and Silver market. So what does this mean?

The PFG Best failure and more shell brokerage failure ( as they are all doing the dirty work of JPM) are causing all the weak hands to dump Gold, Silver and other commodities. The result: A hit to Gold that I am going to say may drop the price from my previous claims down to \$1200 - \$1400 range. In other words, for those sitting on the fence...BUY BUY BUY!!!! This is the time to do it.

This seems to be part of the last moves of survival that banks like JPM and Central Banks are doing on top of all the Hacks and IR Swaps and LIBOR manipulation. The full on assault on the metals market is on and it is time to buy.

You have to see the clear picture that is coming into focus. IR Swaps, LIBOR manipulation, Suspicious Commodity Firm Failures are all part of the concerted effort to keep precious metal prices low. I was right again and you all heard it here on this site first. Here it comes the best buying opportunity you will ever get.

# State of Play: The importance of Owning Physical Gold and Silver

July 19, 2012

The global economic situation has been devolving at a faster pace than that which I can even keep up with. I have tried within these last reports/alerts to give "YOU" an in depth view into not only the inner workings of the highest echelons of decision making, but also the warnings of an impending collapse that will take those that are ill prepared and ill advised by surprise, leaving them "INCAPACITATED" and Destitute.

I will try here to outlay the clearest message that I can convey to you in the simplest terms and that is this: BUY PHYSICAL GOLD AND SILVER AND SELL IT NOT. The reasons are as follows:

1- The FED. Folks I don't know how else to put it. The Fed is not audited and is not accountable to anyone. My source at the NY Fed has confided in me and has let me know what I and many have suspected all along and that is this; the Fed continues to operate stimulus and bailouts by stealth and by "other names" ALL of these bailouts go to multinational banks, sovereigns and the Wall Street Firms. This continues to erode the value of the dollar and is one of the dominoes that will trigger the hyperinflationary depression that we are headed to. I will again emphasize the value of Gold and Silver as a store of wealth as you should be finding the means to purchase them.

2. Euro- The Euro as of June 20th 2012 has been declared by the banking elites as a dead currency and they have exited it in earnest. What is left is a cluster mess of all the bad debts and broken economies that pay homage to a citadel of bad ideas. Since the unofficial collapse of the Euro back in June. For the first time since it's membership, German bonds are attracting a negative yield. Spain is a failed state and Greece is in a pandemic depression on the scale that would make Argentina blush. In other words nothing has changed. The Euro is dead and what is continuing is theater for the masses so the architects of this financial massacre can safely exit with their profits intact. All the while the elites are moving into Gold and there as it is here, the precious metal prices are being artificially kept low keeping the weak trader/investor holding his Physical or ETF with extremely loose grip. How do you think the fire sale of Greek and Spanish Hard assets and infrastructure is purchased? With Euros?! Of course not, these transactions are being paid in GOLD!!!

3- BRICS- Brazil, Russia, India, China and South Africa are forming continuing trade and economic ties without the dollar as a means of exchange. They are setting up their own currency swaps and LOCs. This system that they have set up will work even better when it is anchored by an accurate measure and that accurate measure is GOLD. The BRICS nations are the biggest buyers of that yellow metal, why do you think that is? Why do you think that India is devaluing their currency by design, raising import taxes on Gold and telling people to buy scrap metal instead? Simple, they have to cool down their economy as it was running too hot, this momentary currency devaluation will help them in the long run. They know this, they also know that Gold is running out, so is Silver, thus they are trying to get their population to buy base metals even scrap. China is having the some of the same problems. An overheated economy and a massive housing bubble, what is the fix? Simple, value the RENMINBI in Gold which spells lights out for the US. So to recap, the BRICS are buying gold at feverish pitch that should speak volumes to you, to do the same.

4- Supply- The amount of Gold and Silver that is left on this world is finite. With those in the know buying it up leaving very little inventory left for others. I cannot emphasize enough how important it is to be in precious metals. Folks I am going to make it real clear for you. IF you dont have it in your hands and be able to touch it, you don't own it. Please exit the ETF markets (Paper Gold and Silver) while there is still time, please get out of paper. It is all over-- there is nothing left now-- except the theater of monetary madness and their lying charades.

# There Will Be Blood / Update From V

July 26, 2012

The financial markets are currently in a whirlwind, with the recent LIBOR scandal, the continued stimulus and bailouts, the Euro collapse, the central banks and the TBTF (Too Big To Fails) are now left with the final solution. The Fed will do a "officially" begin QE3, the fancy way of saying that they will begin to print money in order to "stimulate" the economy. The only thing that the Fed will stimulate will be more profits for wall street fat cats and continued nose dive of the US economy, the last domino that is needed to fall, in order to fulfill the globalist satanic dreams. Now with QE3, rockets have been added to the nose dive, we are approaching terminal velocity of a hard and nasty crash.

Since the tremor of 2008 and I do mean tremor not "CRASH", which is what we ARE headed to. The Fed has been stuck on near 0% and now 0% interest. This does nothing to help the average American, in fact it does more to impoverish him. This is simply another means to enrich my old cohorts, the Banksters. Now follow closely to what I am about to say. The Fed CAN NOT move off 0% interest, they are perpetually stuck, in other words this is the equivalent of a car engine being revved to redline until the motor is blown and the innards have melted. Total Detonation. One of the pressing concerns that many have asked me through this web site is if and when will a metals beatdown or massive price suppression be? I will now go out on a limb and show you how. Follow very close to what I am about to say:

In the light of the economic mess, the details of which if I began to write would be too voluminous for this alert. Metal suppression will begin shortly, some would say, "Gold just closed above \$1600 and Silver \$27, where is the suppression?" Don't worry, it is coming. You see in order for QE to work YOU NEED METALS SUPPRESSION!!! QE can not work without suppressing the metals market, it goes hand in hand. Rising metals prices are detrimental to QE and the long term goals of the Fed and JPM.

In the coming weeks look for a temporary RISE before the manipulation kicks into overdrive and the FALL of gold and silver prices right after. I am still calling for gold in the \$1400-\$1500 range and Silver dipping to \$24-\$25. After which anything can happen. I am a economics professional, my forecasts can change depending on global events thus if a war is set into motion within the next few months, all bets are off.

Now that being said. see these continued warnings, Why have some you done nothing? I have told you to empty your accounts and keep what is necessary for day to day expenses, you should continue to buy gold and silver irrespective of price for this is your only store of wealth. Please do not delay the time is short.

# Endgame Activated - Warning from V

August 13, 2012

I will layout something that no else is talking about but is a big issue. That issue is the fact the Russians are irate over the Euro crisis. For you see they have had billions invested within financial institutions and instruments in the Eurozone. They are also one of Europes biggest natural gas supplier, so what do you get when all of a sudden countries in the Eurozone can't pay their bill and the investments that you placed in Euro banks and their instruments go bust? Simple you get angry, especially when NATO is at the same time putting missile batteries at your doorstep to go along side with their dead beat attitude towards paying their bill. All viewed as aggression by the Russians.

The Russians will cut the gas supplies, this will happen in the next few months. This has the potential to be deemed as an act of war or aggression since Europeans are used to the idea of free handouts and or footing the bill to a later date. Back in June I stated that the elites have declared the Euro a collapsed currency (Unofficially of course). I will detail a bit further what are some of the signs of collapse, while the theater of austerity and promises is played out to the masses. After a currency is deemed dead by those that have the power, once they exit the pegs that are knocked from underneath the structure look like this:

Banks are all braced for collapse: This is happening in the Eurozone and the US as well. In fact US banks have been ordered to brace for a "October-November event" This I detailed is the "OFFICIAL" collapse of the Euro. In the US the plans were done back in 2009 not two years ago as some would surmise. This collapse plan would allow JP Morgan and Goldman Sachs to acquire Bank of American and Citigroup. Thus Post collapse there will only be two banking giants in the US, JPM and Goldman. Goldman Sachs will move to full blown retail commercial banking. Yes you read that correctly, Goldman Sachs branches in your neighborhood where you can open a checking account for the new digital currency that you will be carrying. Morgan Stanley will be killed off.

Energy companies pulling out: Apart from the Russians and the mess they are in with the Euro, companies like Royal Dutch Shell the Largest energy company in the world has pulled out all their assets from the Euro. Exxon-Mobile and BP are soon to follow. This will accelerate the global crash even faster.

Bank Hacks: I have told many of you to get your funds out of the accounts here is another reason why. Apart from the banking hacks that is occurring and no one is talking about, which by the way is affecting close to 200 banks worldwide. Gauss Virus that is supposedly affecting the middle east has from my sources confirmed a "Stuxnet created for the banking system" has all the hallmarks of yet another Central Bank/Intelligence Agency operation. Gauss is a beta test, a trail run. There is a more powerful version which will be unleashed right before collapse to sweep all accounts. The name of this from what I am hearing is called project APPOLYON a fitting name indeed. Will they change the name of this destroyer last minute? Maybe.

We are in the final phases of a massive upheaval, with the Olympics distraction over for the masses, look for another distraction to fill the headlines, possible large scale regional war that has the potential to spin out of control into a full scale Global World War. With the close of the Olympics, the state of economics world wide, the elites have nothing else up their sleeves to distract the masses. War is the next made for TV movie. I just hope that it's not as bad as I think it would be, usually it is worse.

V.

## Ominous warning from V

August 31, 2012

As western banking has fallen and the continued sinking of the Anglo American financial slave system is being played out in what I call plebian theater with characters the likes of Soros and Rothschild begin to make public declarations on the fall of a currency (Euro) that they have months ago moved out of. I thought it was prudent for me to outlay the post collapse world that many of you will emerge in.

First and foremost cash is dead. The new means of exchange will be all digital. As I write this the framework and outlays are already in place that will have all digital transfers/transactions occurring on the highest speed data networks. This will be supported by the new smart chipped credit and debit cards as well as those smartphones that many of you are fond of. The smartphone payment system will be called NFC (Near Field Communication). These systems will conjugate into a thorough algorithmic predictable digital database that will allow the banks, corporations and governments to have a clear understanding of who you are. In the monetary world you are what you BUY us bankers can tell the very person and character you are by the very things you purchase. This means it will not simply be your credit score that a bank will look at before giving you a loan. How about a character score to see if your an enemy of the state? Or responsibility quotient to see if your a frivolous spender? The smartcard/NFC system will coincide with internet ID that we are working on as well. Meaning you will not be able to get online without identifying yourself, your web logons will be tracked and will be looked at along side your purchases, all digitally controlled and maintained.

I fear that this system that is already birthing out before us will eventually evolve into some sort of implantable chip. You see these are all moves for the sake of ubiquitous computing and what transhumists and futurists call singularity. These two movements or fields of thought are funded and fueled by the elites of banking. Your freedoms will be conditional and your privacy non existent. Long ago you Americans and much of the western populations have become the human collateral and as your economies are being killed off by design you will emerge as the new serfs on the new plantation we call Earth.

There are no further warnings that I can give any of you that I have not said already. If you still have money on paper your a fool of fools. If your still sitting around wondering the "if" and not preparing for the "WHEN" then you are a bigger fool. What more signs can you seek? The accounts are be swept, metals are being suppressed even at \$1650 plus, war is in the air, your country is about to declare martial law, many of the elites have left or have emergency relocation plans already activated. I myself am hunkered down. Prepare, if you have read my alerts from the beginning you will see a clear progression of events that is playing out right before your eyes. You would see the handwriting on the wall that Steve Quayle has been warning you about for years. Now I too am warning YOU.

Ignore the main stream media, ignore the talking head pundits, do not listen to those who say all is well and the markets will come back. We HAVE entered into the final phase before collapse the only sign to watch is the final financial solution. The only thing you can do is prepare, watch and wait. I promise you it won't be long now.

**Critical Mass in the Financial Markets  
Euro and the US Dollar in Orchestrated Collapse  
V Alert**

October 22, 2012

Steve I know that it has been awhile since I have posted any alerts in your site. This is because things are getting critical mass in the financial markets. I want all of your audience to understand and think in the understanding that all real trades have STOPPED. All the real money is moved out, the Euro has failed and now begins the death and freefall of the dollar.

The main reason for the Euro failure is this: the Euro was created with the sole intent to become an instrument of not only seizure of sovereignty but seizure of all assets and infrastructure. What do I mean by this? Simple, there are untapped oil, natural gas, and mineral resources in Europe waiting to be exhumed by the multi national corporations, funded by the banksters, and controlled by the elites. In order for this smash and grab to be successful look for the following to occur:

The Euro power brokers will receive the power and authority that they will need in order to further clamp down control on the people of Europe. This crisis is their doing and they will try to play sides off each other in order to convince the population that this is their fault and the greedy who work in the nefarious private sector. This can be stopped by the populace if they stand up but I will tell you the plan is to make them suffer so greatly that they will beg the Eurocrats to rescue them. Once again the Eurocrats will step in as the saviors.

America: to say that it is over for the US is an understatement. I stated multiple times that the Anglo-American branch will be pushing for a global war and I still hold firm to that view. Expect a massive down turn in the economy from now till December as a dismal holiday season befalls the US. The cancer that is stagflation has begun and it is running its course. Look for more big banks to go bust, sell off/dump divisions, downsize and ultimately come to a parabolic collapse. The derivative market will go belly up soon, JPM's recent loss in that market was the first sign that all is not well in Oz.

Capital controls are being implemented here in the US and will continue its shackling of people and their money. I end all my posts with a warning to prepare. I will urge you now more than ever to do so.

V

## V's Year End Review

December 17, 2012

To say that we are headed to the most troubled time in human history would be the biggest understatement in history. Over the course of few short months i have warned many of you through this site and we are here at this point. I will now allay what and where we are headed in the market and the world in general.

I have said some time ago that this would be the most dismal hoilday spending season and to date it is. Folks we are in a depression, the sooner many of you understand that the sooner many of you can stop playing these silly games with your selves. Games like: "should I take my money out of bank?" To "what is the metals market doing? And should I buy or sell? " My friends I will leave you with this forecast and warning for the close of this year. The final quater numbers will be terrible. Companies will continue to shed their labor force and the full on solvency crisses will be brought to light by the soon collapse of the derivative market. The American people though would be too broke and too busy trying to earn a living

That this light of information would not even register. The coming onslaught of banker healthcare aka obamacare and the taxes that are included with it will be final siphoning sound the American middle class and small business owners will hear.

My final peice of advice is this: to the sceptic and ill prepared best of luck to you for your destruction will come upon you quickly as your heads have been in the sand too long. To those that are awake: get your money out of the banks, keep only what is needed to pay bills. Buy gold and silver and sell it not. Most of all stop watching the market numbers. ..we in the know have stopped looking at market indicators for we know there is no fix only a parabolic collapse. So please stop watching what the market ls doing get out of your funds and be prepared. I have said many times that the market is screaming for war and that is where we are heading. I will provide more info soon on a later date till then God speed

# The V Files: Japan

V's 1<sup>st</sup> radio appearance on the Hagmann & Hagmann Report, January 11, 2013

Hour 1 (9-10pm)

Financial insider's emails

Commodity trader, metals trader, worked for largest bank, head of trading desk,

Time to warn the people

Cataclysmic

Why he had to cancel last Sunday night

Steve Quayle gives me props!! (listen from 3:28 onwards)

Meeting last week; how it affects Japan

7 years ago March 10 prophesey; V had to go into a meeting which is why he had to cancel his radio appearance last Sunday 1/6/13

After WWII Japan copied Western banking; incredible growth then it had the 'lost decade'; massive financial problems; deflate & devalue currency to make exports better; problems with currency devaluation; printed more money; Fukushima accident made a bad situation even worse

2008: Japan was heavily leveraged with Euro bonds and U.S. dollars (2<sup>nd</sup> highest buyer); 2011 Fukushima accident: insurance companies had no funds to cover claims; "QE infinity" for decades as well; put a squeeze on economy; they have to float more bonds; they are the bond buyer (monetize their own debt); Euro is decoupling; death knell has started; investment banks have written off Japan (they're gone economically); radiation levels; they will leave Japan to die; economy is overheated; borrowed money from their own citizens in the 1990s;

All Keynesian models end with war, conflict and/or an economic collapse (depression)

China is Japan's biggest trading partner

Pure insanity on Japan's part; Japan is like England, the England of Asia (economically)

Fractional reserve banking; England lends out money 100x; recipe for disaster

Multinational banks: princes of fiat;

Japan – most fragile economy in Asia; most export-driven; food & resources are imported; economists say Japan doesn't fit the emerging global economic model (Keynesian); they will let Japan collapse and will reset it afterward; they were the 2<sup>nd</sup> largest buyer of U.S. debt (treasuries)

Chinese is getting out of U.S. dollars and more into metals

Less and less buyers around for U.S. debt;

Political volatility in Japan

V was called into a late-night meeting last Sun: they're done with Japan

Dreams & Visions: Brother Bob prophesy from March 10<sup>th</sup> or 12<sup>th</sup>, 2006 or 2007 (?); financial collapse; Stock market imploding and exploding at the same time

Japan is the domino

Cognitive dissonance; mental disconnect

Derivatives: ticking time bombs; fuse will be high-frequency trading; sudden calamity à panic

3-legged stool for U.S. treasuries: Chinese (holding), Japanese (holding), Federal Reserve (printing to infinity), 2 legs will get out, last leg is cracked beyond recognition

Japanese coming to a halt; higher than a U.S. collapse

Japan overleveraged with U.S. + Euro treasuries; they'll be the first to pop (go) in 2013

Ancillary support systems must be taken down first; since Brettonwoods they had to create ancillary systems to support the rise of the U.S. dollar (e.g. the Japanese Yen; guarantees that oil would be traded in dollars, etc.)

Overheating in Chinese markets; turmoil in Asian markets; all ancillary support systems for the U.S. dollar; before the main system dies (dollar) the support systems will die

In an hour their wealth will be worth nothing

One of the nation's silver providers is out until 2/15/13

J.P. Morgan's SLV market is heavily manipulated; whatever the price of gold & silver don't look at spot price, just keep buying it

silver is more precious, globally we're running low (it's used for industrial purposes)

5 – 6 banks involved with silver manipulation (keeping it low)

Causes silver to be dumped & major selloff of futures contracts

700M oz. of silver being reinvested in derivatives

The Coming Economic Reset: before it happens: wild fluctuations w/gold & silver to strike fear, uncertainty, confusion; afterwards: \$500-\$600/oz. silver & \$4000-\$6000/oz. gold

Total market availability is rare for both gold & silver (\$23 – \$45/oz.)

24,000 oz. = 1 metric ton

What is value? Price vs. cost

Americans have a 30 sec memory; understand price but not so much cost/value of investment

Fiat system -> price mentality; no real value; have to go to something tangible

Farmland, things of value, hold on to commodities

Currencies have no value

90M Americans are receiving some handouts

100M underemployed or permanently out of workforce

50% of country is darn near effective

People are not thinking ahead

Shadow banking system in China

Technology à China; J20 Stealth Fighter in 2011; they have energy weapons; China allowed foreign investors to come into their country; they will float their currency; artificially suppressing their currency; in order to prevent the overheating; their fiat currency will be backed up with commodities

Capitalism is the best economic model ever

China holds all the chips: gold, silver, strategic metals; they're hoarding; India is not far behind

Hour 2 (10-11pm)

When an economy spirals out of control

- austerity: cutting of goods & services à firesale on infrastructure & assets

- massive unemployment Spain is more like 30%

- capital controls (1,500 Euro withdrawal limits)

- people going hungry; dumpster diving

What have the rich been doing? Not holding fiat (currency); they're all out of paper; they're promoting the paper so you can chase the paper

Farmable land, precious metals, strategic metals, rare earth metals, oil, food staples, firearms, medical supplies

It's hard to call exact timelines; what are the major players (big investors, multinational banks) doing? No one's looking at the Japanese markets; it can happen between now and April

BATS trading: they couldn't clear massive amounts of trades; 3<sup>rd</sup> largest trading house; they can't even offer a NBBO; \$100s of billions in disarray due to high-frequency trading; there is no volume in the market

IR swaps, high-frequency trades

Goldman Sachs

Scaffolding that's holding it all together: economics, finance

Steer economic policy; software to steer an equity trade in milliseconds; no trust or honor

Pensions are going to be raided

All (war, economic collapse, etc.) of this comes down to what your and my definition of money; how you define money

Money is being manipulated through fraud and coercion; ends up in war or collapse

Vulture capitalists (Goldman)

Practical economic advice and what to look for? What Jesus said

Lots of signs: "QE infinity" (9/2012); signs are all around you, yelling and screaming at you

Shadowstats.com (John Williams)

Invest in precious metals; money in bank for day-to-day expenses

We may only have 1 – 2 more years; now is the time for you to store up wealth; try to pay off your mortgage; if you think you own your home in this country you're a fool (don't pay your property taxes and see what happens to you); do you have a place where you can be with like-minded people?

Buy land and make sure you own it (e.g. through non-profits)

[sounds like he's living in the U.S.]

The key is preparation

Dollar gets devalued you can pay off your mortgage with gold & silver

Hyperinflation is the best scenario to pay off your debts IF you have hard asset currency

Dare to prepare; be prepared

What's a collapse in the U.S. is going to look like? Martial law in most parts in the country; bread/food/soup lines; we'll come out of it in a couple of years

Keynesian model; we haven't had capitalism in the U.S. in last 50 years; similar to Russian collapse of the Ruble

We're already in a depression; we haven't hit rock-bottom yet; politicians kicking the can down the road

They know a civil war is coming

Clif High (web bot; halfpasthan.com) and Steve Quayle don't get along...

Cost and availability of food

The Swiss just bought Alpine Air foods; Steve thinks they'll also buy more long-term storage food companies; food market is so inelastic; it doesn't do you any good to leave non-performing assets and not have food; food should be first

Disconnect between the farm and the field in the grocery store

Mountain House (? or Dry Harvest) has 95% GMO-free foods  
People have got to learn to barter and trade

What is the value of food to you? Food = life; lack of food = death

Understand the basics of how things work

Book recommendation: Murry ? the History of Money and Banking in the United States; Socialism by Ludwig von ?

There's a profit motive

Holding on to a non-performing asset vs.

Visualize everything that they own (currency, commodity, equity)

Buy, sell, trade or render service

Investment should be that which performs

RFID chips

Things are going to be digital

Basket of currency with special drawing rights

High-frequency trading over the past 5 – 10 years; software exists to track every deposit worldwide; not a single transaction that can't be traced digitally

All American funds will be raided and blamed on a 3<sup>rd</sup> party belligerent

Capital controls

All Keynesian models end in war or collapse

Multinationals: purposeful designed bad investments

Financial NVAA: multinational bank can pilfer local bank (that's what happened with MF Global, Gerald Celente)

Vin/Van is his name??? ~ 11:01pm

Glass Seagal (?) law reinstated? All of this comes to an end

V departs after 2 hours

Hour 3:

(not listened to because V had left the show at this point)

## Email #24

### **V -- Background Alert -- Currency Wars Lead To Shooting Wars -- Hack Attacks On Banks Now**

*Attn: All SteveQuayle.com readers this is an excerpt I published back in 2009. This was insider information then and it was circulated through various financial houses in NY. Please read this excerpt to understand the currency war and why treasuries are rallying for no reason. We are in serious trouble. - V*

January 15, 2013

"Now follow closely to what I am about to say. We have never recovered from the September 2008 crash. All this talk about a "double dip" is a moot point as we never clawed our way from the first dip. The economy is as it has been for the last two years; heading down, no matter what all the talking heads on radio and TV say. For you see in trying to perform the same techniques which were applied with the crash of 1929 and 1933; the Fed has exhausted its cache of stimulus tools. They have done nothing and they have nothing left. After pumping trillions into stimulus plans, and trillions to improve balance sheets of the "Too Big to Fail" banks they have accomplished one thing; they have UNDERMINED TREASURIES!!!

Treasuries are the very threads that is holding this economy together and now these policies have metamorphosed them into the NEW AND IMPROVED TOXIC ASSET!!! Every world economy knows that they are overvalued, they know that their yields are mediocre and still no one in the main stream talking head shows ever rails against or even exposes them. The whole world cart blanche walks on eggshells around treasuries as if it were a Financial Nuke with a trip wire trigger and a timer. A bomb if you will....which IT IS.

History shows us a pattern when and how this financial Hiroshima goes off. It begins like this:

There will be a slight and sudden rise in a price of a necessary commodity like Oil

This will send tremors through the treasury yields, Treasury Mangers will sell off their allocations and go into the commodity (e.g. Oil) in order to grab a profit. I guarantee that they will sell treasuries as it's the primary asset that many of them can sell.

This will trigger the Fed to step in and buy the dumped Treasuries as they are trying to stave off deflation by keeping low yields and cheaply funded. (Quantative Easing) The Fed knows that the Bond Market senses a "Treasury Bubble" and once again they turn on the printing press to buy every treasury in sight to calm the markets and create asset price stability

The Zombie "Too Big to Fail" Banksters smell blood in the water and begin to dump their obscene amount of treasury notes. You see these living dead institutions were never nationalized but got the best parts of nationalization; total liquidity (stimulus money) and easing of accounting and regulatory rules. The flip side was the Fed required that they purchase US treasuries. You see buying up of the treasuries allowed their balance sheets to look well funded and monetized, all the while hiding the toxic assets that were being siphoned off their books by the Fed since 2008.

The Panic sets in...Asset managers are not stupid they know the US is in much worse shape than Greece.

They know that there is a "Treasury Bubble". So when these mangers see the mass buying of treasuries by the Fed, and the mass dumping by the Zombie Banks, it will be their signal to get out of Dodge!!!

The Zombie To Big To Fails and Asset Managers that have dumped their toxic treasuries will look for a place to park their new found cash. Now where might you think they can put all that new cash into? COMMODITIES. Commodities of all types will shoot to the moon. From precious and industrial metals, Oil, food staples will all skyrocket in price, catching the American public with their pants down. Commodities will be the only safe haven to go to and this is when the American public will get it's first taste of hyperinflation and it will taste like gasoline when the price of oil surges passed \$150 a barrel in one week equating to \$10 a gallon gas!!!

Commodities SOARS and DOLLAR COLLAPSE ensues. The sell off of assets in purchase of commodities will be ballistic. People will unload homes, cars, personal belongings all once thought important for real assets like Gold, Silver, Food, Weapons, and Oil. In hyperinflation your \$400,000 house will be worth \$60,000 or 70 pieces of silver, for your house will not be able to help you buy things you need, while a commodity like gold and silver can.

Most of all the government can't stop it.

## II. Currency Wars

Another front is brewing in this mass pandemonium that is hurling toward us in thunderous fashion. That is the currency war that is beginning to heat up. You see during the 90's America went through it's dot com boom primarily off the money that it borrowed from the Chinese and other foreign investors. So when the dot coms became the dot bombs, and when that bubble Burst the banksters at wall street and the financial mafia running the Fed needed fresh meat. After all the Chinese will be not so willing to throw their money into another tech stock venture with the US. at that time Alan Greenspan cut interest rates down to an unheard of 1% and eased bank lending. Thus in turn creating the housing bubble that was one sub-prime needle away from being popped. Now while all this was transpiring many political hacks and think tanks in the "District of Criminals" were beginning to complain that the Chinese were not allowing their currency the Yuan to float, that the Chicoms were artificially keeping it's value low. In turn creating a very large trade surplus for them, and a large trade deficit for us.

If you have been following the news lately, you would have been hearing the vast levels of complaining within the Anglo-American financial houses, the vast monetary disparity with the Chinese Yuan and even the Euro. In fact it is my opinion that this past summers Euro collapse was a orchestrated act of financial warfare perpetrated by the British and American banking interests. That I will leave for another time. It is comedic that many in positions of power feel that it is the Chinese that is to blame for the economic dearth that we are facing. Now the madmen are sensing that the Wall street Casino may be closing, and in a last ditch play to make profits, and grab power. The overlords at the Fed and the Banksters on Wallstreet are in a race to the bottom. Devaluing the dollar as some sick way of kick starting the make believe economy. Hoping that a devalued dollar will make us more competitive in trade.

One thing that I will tell you is that in a currency war no one is a winner. Von Mises the famous Austrian economist that invented the Austrian school of economics said it best when he said that the way to destroy your middle class is to devalue your currency.

Back prior to 1913 and the creation of the creature that we now know as the Federal Reserve, a country's currency was essentially it's stock. A nation that produced, and sold it's good and wares had a very strong currency affording it's citizens a very good quality of life. Gold was the anchor that tied the majority of nations currencies back then, preventing the creation of economic bubbles, guaranteeing the stability of sound economic policies and power of wealth in the hands if the citizen.

Today money printed out of thin air and backed up by nothing is the order of the day. As we traverse into the current state of affairs, history has once again proven that fiat (by edict) currencies and central banks are failures. By engaging the Chinese, Japanese and Europeans in a currency war, a race to the bottom will do nothing but destroy us and what is left of our middle class. By trying to hit cheap Chinese goods with a tariff will incense the Chinese even more. This is not something that you want to do, especially since they are still the largest holders of your debt."

## **Update On Markets From V -- Fools Rally -- Market Collapse**

January 24, 2013

On January 11th on the Haggmann and Haggmann show with Steve Quayle and myself as guests I broke down the plans that would emerge in the next coming weeks and months beating all market headlines by weeks yet again. Today I want to bring to remembrance something I have highlighted months ago in one of my alerts, that as the endgame is being played out you will see the market soar, the dollar rise, metals suppressed, the VIX the lowest its been prior to collapse. In other words I said that everything will be done to make the US look like the safest market to every non insider in the world. Am I wrong? Look at the DJIA at an all time high with the volatility index (VIX) at an all time low. In other words the mindless orgasmic party has begun on wall street, the revelers are euphoric as a bunch of teenagers on a drug binge. This is the fools rally that I had feared and history will repeat itself. I will update soon. The collapse will begin...V

## **V's ALERT JUST IN 10:00 PM All Over Asia Gold And Silver Is Being Bought Up At A Ravenous Rate**

January 27, 2013

Steve, here is the latest rundown from the asian markets. The markets are responding very positively to the moves that the japanese have done. Everyone now understands that it is a race to the bottom. All over asia gold and silver is being bought up at a ravenous rate. India in spite of raising tariffs on gold imports have not in any reality stopped or slowed down their gold purchases one bit. Indonesia is going long on gold as they face a currency crises of their own and must devalue. Singapore and Vietnam is purchasing gold and silver at a rate that is staggering as well. The asian tigers all understand that it is now an official currency war and what japan has done has caused a regional conflagration that will cause further buying of gold, silver and other precious metals. India is facing a currency crisis and is debasing now as well.

Steve when the smoke settles the BRICS will be left holding the cards particularly the Chinese. Japan has caused massive regional instability that will lead from a trade war to a all out shooting war. Look for platinum, palladium and rhodium to go strong very soon as gold and silver is beginning to dry up in asia. Gold and Silver markets closed on a down note on Friday, look for further suppression as again supply and demand is overlooked and unaccounted for. Asian economies are looking at what the Fed and US markets will do, the signal that they will get is the confirmation of dollar devaluation a currency kill has started, the dollar is set to die and the first shot was fired by Japan. A financial pearl harbor but this time it was the US central bankers that forced the hand, that in all reality made the first move. This week will be interesting.

**V'S ALERT: The World Economies Have Officially Gone Dumpster Diving. A Currency Race To The Bottom Where Everyone Loses And The Banksters Win.**

February 13, 2013

Wow what an opening to a new year. Anyone one who has been following my posts on this site knows I have been calling for a currency war for some time now. You would also know that on my Jan 11th interview on the Hagemann and Hagemann radio show I detailed the coming chaos in Japan, its economic implosion and the push to go to war with China. Also detailed was the Feds backroom deals with the eurobanks. So where do we stand today? Well The funny thing in all of this and what I want you to follow in the next few weeks is this:

1. Japanese economic/monetary. Meltdown.

2. Eurozone will choke Germany. With the desire to better buttress the EUR/USD ratio while the world deflates the clueless eurocrats will inflate the Euro killing the the exports and the economy of the only country left standing in that socialist cessation pit; Germany. Look for a dutch mark resurgence movement to spring up faster than a Polka dancer at an Oktoberfest. This time though it will be Germany's industrialists that will be screaming bloody murder.

3. The time is coming with the advent of currency war...metals will go Apollo 11 because Washington we have a problem: faith in US t-bills will be deteriorate faster than ever as the illusion of paper safe havens will become nightmares, the herd mentality will kick in and you will see a mass migration to metals.

4. Get it while it is hot. Silver is still the best buy and platinum and palladium are the come back kids of 2013. As war kicks off look for these two cousins to stay strong.

5. Bank hacks: I can not emphasize how serious this is getting the time to get your majority deposits out of banks is now. The recent hacks and "site down for maintenance" is the betatest soon it will be the real thing and by then it will be too late.

Keep an eye on these things in the next few weeks...and relisten to that hagemann broadcast with me and Steve Quayle it is as headlining today as it was back on Jan 11.

**V's ALERT – MADNESS HAS GRIPPED THE GLOBE –  
Economic implosion that will rearrange the grand chess board of fiat currency**

February 28, 2013

As madness seems to have gripped the globe it seems that the end of this lunacy will be an economic implosion that will rearrange the grand chess board of fiat currency. This coming day of reckoning will shatter the dreams of central bankers and crush the aspirations of politicians who hide their avarice in cloaked altruism and ignoramus ideas.

As the fed has been purchasing MBS (mortgage backed securities) and pumping away with QE infinity they have once again created a problem that they themselves can never fix. If one were to look at the money supply in this nation one can see that deposit rates are far out stripping loan rates. Lets put this into perspective, joe sixpack on the street is broke, main street america continues to be decimated and yet bank deposit rates are at an all time high. So what does it mean? When the crime lords at the fed decided to buy MBS the deal was to purchase the accounts from primary buyers and leave the a cash deposit at their account with the fed itself to which the primary buyers have access to.

The primary buyer would simply take the cash and deposit it at one of their member banks and viola instant billion dollar deposit. The problem is that the economy is so broken, unsure and unstable that member banks can't loan out those deposits as the risk for business ventures is at an all time high. Corporations are unsure and weary of the volatile market that future growth and investments have all been put on hold. So what does it all mean? Ill put it to you this way. Picture if you will a massive boat that has a very shallow bottom and is incredibly top heavy. This ocean liner will be called SS US Economy, a once lavish ship designed for and retrofitted for good times and pleasure. The very top floors of it's decks contained all manner of entertainment and gastronomic indulgences from shows to eateries, theaters and recreations. The only problem is that this boat was designed only for fair weather and to make matters worse, the crew have gone on a drug binge and destroyed all the radar and navigational equipment. On top of that good news this very top heavy ship is heading straight into the mother of all typhoons. This folks is what the US economy is. What once was a battle ship tempered by conflict and fueled by rugged individualism has now been refitted to a pleasure liner with a very shallow bottom and a very heavy top.

The fed has made the economy top heavy on top of all the other problems these madmen have created in the market place. This extreme supply of deposits will be more gasoline to the soon coming hyperinflation and currency bust. Folks this ship is starting to keel it is time to head to the life preservers of precious metals.

V.

## **The Last Samurai-Japan Initiates Hari Kari-Financial Dis-Embowelment**

March 12, 2013

What I warned about back in January has now come full circle. The Japanese have decided to perform Hara Kiri on themselves and disembowel their economy on a global stage. What can only be described as willfull suicide the BOJ has decided to begin buying derivatives. The most volatile financial weapon of mass destruction will be purchased by the Japanese, the question is why?

You see friends what I have said before is that Japan has been set up as an ancillary support system for the dollar dominated world market. As the US economy continues its death spiral Japan has been ordered to jump on the grenade and keep the dollar charade going for just a little bit longer. The poor Japanese people have been sold out by their leaders and the only nation that could have helped them, they have alienated, China. Japan will be buying US derivative debt, there by releasing some of the pressure build up in the derivative market helping the TBTF banks (Too Big To Fail) in the US, as well as devaluing the currency by taking it to nose dive hyper speed.

This will not set well with the Chinese as they will have to devalue as well but the difference being the Chinese have prepared for this ten years ago. Japan is finished, energy and food prices are through the roof they are moving from the lost decades to being the lost civilization. I implore the Japanese people to stand up and put an end to this maddness. Your leaders are all double agents of globalist banking interests they have sold you all down the river. They are now trying to genocide you by pushing you to a war with China that you cannot win. They have poisoned you with Fukushima and they are impoverishing you with their economic schemes. Please stand up and take your nation back while you still have a chance.

For everyone in the US please ignore the spot prices of Gold and silver as the physical is harder and harder to come by. Keep buying you will need something to bribe, barter, and buy with in the days that are ahead. As I told some of you months ago the DOW is going to go hyperbolic, up 14-16000 points before the final massive crash. Be prepared.

## **V's Comments On Cyprus Burning And What Lies Ahead**

March 17, 2013

Steve, I thought the Greek situation was heartbreaking when a nation, one of the forerunners of democracy and individual freedom has been ramshackled by the vampiric borg named the EU. I thought the strip mining program of Ireland's economy was bad, when the Celtic Tiger was relegated to a Gaelic kitten. The crisis in Spain and Italy was something that I was watching intently looking for the very playbook of austerity, the strategy of impoverishing nations and subjugating individuals laid bare to those with eyes to see,

Cyprus is a tiny nation one with a tiny economy, in other words the perfect environment to run a beta-test on what a GLOBAL AUSTERITY would look. The perfect economic laboratory. What is purposed in Cyprus was for many years a program that was discussed by central banks, the IMF, and the world bank. This program undertakes the procedures and methods to bring down large globally traded, high GDP based currencies. In other words, Cyprus is simply not just the canary in the Coal mine it is the Coal mine. It is the very picture with all rudiments and structures of a self contained economic petri dish that has been setup to study the contagions of the Euro. What they could not do in Iceland they are doing in Cyprus.

To clarify this I will put it to you this way: Cyprus for all intents and purposes is a self contained economy, an island separate from main land Europe thus making it perfect to implement harsh capital controls like the proposed levies on bank accounts. The people of Cyprus can not escape as there is no adjacent border close to it. Except Turkey which is 47 miles away and a source of contention amongst the Cypriot Grecian majority. As I said the perfect petri dish.

The proposed bank levies of 6.75 per cent and 9.99 per cent on account below and above \$100,000. The real numbers would be over 10 per cent for below \$100K and 20 per cent above \$100K. This is crushing to savers, punishing investors and destroying what is left of the Cypriot economy. This will cause a run on the Cypriot banks as people pull out. The rich of the island will flee not to the Euro but to the dollar raising the DOW and US T bills. Cyprus is an appendectomy of the sick man called Europe.

So what does this have to do with the American and the price of a Big Mac in St.Louis? Simple. The American national debt sits at (not counting entitlements or financial market losses) at \$16 trillion. Guess what is the amount of money that Americans have sitting in their banks? That's right \$16 trillion. Mark my words they will do a play on your funds while selling you the bill that it is your responsibility to pay the piper.

Look for this in the coming weeks and months. The bank run in Cyprus will send panic across the Eurozone's southern economies. Causing the populace the pre-emption to remove their funds before the Banksters come knocking. The Cyprus situation will cause further angst and hatred to the German architects of this plan. There will be a move by the Cypriots to exit the Euro and go back to the Cypriot Pound, which in my opinion will be the best solution for them.

The further turmoil in the Eurozone will cause a major flight to the USD. The DOW will sky rocket past the 15,000 barrier and onto to 16,000. All this of course will be the temporary ruse as Japan implodes. The only way to survive and exit permantly the games and the nexus of the Banksters is to buy precious metals. Do it NOW another sign has been passed on the road to collapse.

# The V Files: Guerrilla Finances

V's 2<sup>nd</sup> radio appearance on the Hagmann & Hagmann Report, March 22, 2013

Hour 2 (note V came on during the 2nd and 3rd hours of the 3-hour show (not hour 1))

Show title: Guerrilla Finances

V: What happens in Cypress doesn't stay in Cypress...

Cypress is a Petri dish through which the contagion of the Euro will fester

Cypress is the canary in the coalmine; will expand to the U.S.

Western banking world theme: US dollar is the reserve currency

Flight to the dollar and US treasuries

So many corrections in the bond market; worldwide ravaging of wealth

Massive crash within the market

Every play is the keep the dollar going, the last safe haven, everyone is flocking to it

End game? Global currency; have to get all people on the same boat, push it out to sea & then sink it

Chinese & Russians being suckered into buying US real estate; it's a game

Temporary flight to the dollar; temporary safe haven ("life jacket"); so full of holes that it'll sink everyone

S: Cypress has natural gas

Russians got tipped-off before Cypress banking crisis

Massive printing of US dollars; monetizing all of the debt

Derivatives market worldwide ~ \$1.5Q; toxicity of derivatives market

Euro is dead (by design)

V: Russia is Europe's biggest natural gas provider; Europe hasn't paid their gas bill

Cypress banking debacle

Russians oligarchs pulled their money out of Cypress

Cypress people want out of the Euro;

rush to the exit door ◊ Eurozone can't let members leave

Cypress is being made an example; they have to pay back their loans; pay down their debts

Capital controls have been placed into law

Russians are not going to sit idle by (60T cu. ft. of natural gas in estimated reserves in Cypress)

Eurozone contagion: considerably overleveraged with American subprime mortgages, derivative, CDOs, CDSs, etc.; ton of debt held by European banks

V's old employer is the Royal Bank of Scotland (RBS);

Derivatives are "too big to talk about"; \$1.5Q in derivative debt; will scare people into waking up

This Cypress thing is very serious; we are in a brand-new 'Cold War'; fight over banking control in Europe;

"testing of the fences"; beta testing; military maneuvers;

S. Korean cyber attack

American online banking down; banking networks are suffering the world over; this is all a set-up before the big pop happens; massive hack will wipe out a lot of accounts; massive capital controls in Cypress, Greece, Spain, Italy

Word on the street is the bank levy tax in Cypress will spread to the US (it will be 30%); Are you prepared for that?; 30% levy on deposit accounts in the US; there will be a warning (for those who are awake)

Scenario:

Sunday night/Monday morning: collapse in Japan; massive economic contraction the likes of which no one has

ever seen; will ripple across Europe; economic market will go up in flames; massive Asian continent sell-offs; aggregate asset prices will go through the roof (e.g. oil will skyrocket)

Mon 9:30am: massive pre-market sell-off; panic; massive sell-off; Europe & UK are the last support systems  
Mon 12pm: Dow will drop 5,000 points; failsafe will trigger before noontime; markets will shut down and not open;

Tue: all banking will come to a stop; country falls into crisis; monster (derivatives) will be pulled back from the curtain; 30% banking levy will be imposed as the “solution”

Vast majority of Americans will be in favor of this “solution”

Never take your eye off Japan; what’s happening there is super critical; last 30 years transfer of wealth from Western to Asian countries; manufacturing hubs; when Japan goes it’ll be elites way of siphoning wealth of Asian countries; global strip-mining program

System is so intimidating to them; economics & financing are like a black op; people just don’t want to take responsibility for their own financial future; people used to understand what real wealth was, difference between money & currency; mental disconnect

Christians in America: baby form; disgusting joke; no responsibilities; enamored by programs; fail to teach about enemy out there; we live in a world where Lucifer controls every aspect (banking, debt); willing to go public schools (“you don’t lose your kids you give them away”); watch junk on TV; fathers aren’t leading their families; Sunday Schools follow the same format as public schools (doesn’t create individuals but slaves/workers); people don’t understand what currency vs. money is; like to write-off responsibility; Jesus will rapture us out

How to prepare?

V would like to teach a course on “survival finances”

You should prepare now

Steve’s referred to his other banking insider’s recent email

<http://www.stevequayle.com/index.php?s=33&d=325>

Craziest thing he hears is when people say that they have to get their money out of the bank; then what? hyperinflationary world

This is financial survival; the way you escape/prepare; there is only 1 way: precious metals

Currency vs. money: paper vs. real wealth (precious metals); paper vs. money; precious metals (gold silver)

Take some of your money out of the bank and roll it into gold & silver; what happens when the precious metals markets drop? Buy more; when it goes up? Buy more;

Don’t worry about your mortgage: in a hyperinflationary world it’ll be easier to pay off

Resurgence in gold & silver as legal tender; credit-card-sized gold & silver for purchases;

Reality is it’s happening at an alarming rate

You have to learn how to escape the nexus; you don’t have to know about financial instruments; if it’s paper it’s not worth the paper it’s printed on; only measure of tangible wealth is gold & silver; on the path to free yourself of the system

We think short-term; we talk about storing wealth; guaranteed wealth for generations to come; the world’s elite are always purchasing gold & silver; real wealth is in gold & silver (hard money); paper is what they created to play around with, to kill each other, to defraud each other, to harm each other

Things in Europe will spill over to the US; you are part of that picture; your life will be affected

Hour 3:

Q: Real estate income rental because investing in precious metals does not provide cash flow

FL rental properties owned by a Turkish friend are now underwater (value less than mortgage on it); how do you guarantee the monthly rental payment by your tenant in a hyperinflationary environment? Where do you draw the line? Same market in 3, 6, 12 months?

Real estate market will drop even further

If your holding

V respects Peter Schiff

Renter gets all the benefits without the risk (landlord has to take care of repairs & upkeep); most houses are called a money pit

Real estate is only a good investment if there's a bubble to back up that investment (everyone is making money on the up & up)

How do you generate cash flow? With real estate when collapse occurs you'll be left holding the bag; are you prepared to exposure yourself that much; get a second job; sell something; what skills are you good at and market it

S: Steve buys gold & silver from the mint & mines and sells them for a profit; he's a dealer; he sells metals from the market

What is China buying with their dollars? Gold & silver mines, physical commodities, strategic metal holdings, farmland, water rights, gas & oil deposits, etc.

Credit-card-sized gold bars (50g) .9999 pure gold

Investing in nothing is still investing in something (e.g. in a bank at < 1%); negative interest rate for bank to store your money! If you don't get access to what you have (e.g. take physical possession of it) you don't own it

It's about survival; help other people; when someone's broke they can not help anyone V: people make money when the markets go up or down People sell their gold for dollars so they can buy more gold for dollars

Whatever is being sold is being bought up; any sales going on are getting the weak hands out of the game (e.g. price dip) Very hard to get gold & silver; difficult for a lot of dealers; timely delivery promises are getting

difficult Temporary position to buy more gold & silver later All elites are holding gold & silver tight S: Form 8300 for cash sales > \$10,000; FINCEN monitors every transaction; no required reporting requirements for gold & silver purchases

Gold & silver for barter & bribe; jealousy & envy; don't buy rental property; 9 out of 10 people have poor credit; there are no credit-qualified tenants

'When goods don't cross borders, armies do'

V: most Christians hear the warnings but deny... V drops off ~ 2:28:00 for some unexpected reason ( not 'on air')

S: fiscal cliff" is a NLP term; you're being programmed to accept failure

Parable of the 10 Talents

Destruction of complete classes of people; nation is coming apart at the seams

V returns ~ 2:39:30

When will a new global currency be in place?

V: it could happen within months; once things collapse, Special Drawing Rights (SDR); concept is they'll have a basket of currencies that'll be pegged to the supra currency, borrow based on your country's GDP;

infrastructure is already in place; nomenclature (name) is not decided yet (for the digital currency); this will happen in your lifetime (you'll live to see it); 2 – 3 years max it'll happen; can happen "any day now" (the trigger event)

What about BitCoin? Digital currency; the 'Linux' currency of the modern world; it's completely technology/Internet-based; guess who controls the Internet? Building a financial system based on an infrastructure they don't control (how can you promise security/stability?); you're better off buying gold & silver bullion

S: assimilation of you into the global mind; the system is working again you

V: online banking unavailability is not normal operating procedures; central banks intelligence networks are working to take down the banking system; how much were really cyber-siphoned? Japan & Korea are the 2 largest car manufacturers of cars to the US; if it's a "glitch" you'd be able to trace it / isolate it to a specific network; when all of the networks are being attacked then that's not normal; warning sign; "backdoor" people (world intelligence agencies)

Prepare; he's given us the roadmap; there's nothing left to do; we've blown past the road signs

Final signs: Japanese collapse, failure of the Euro, collapse of the Asian markets, Middle East going up in flames, spill-over to the US

We need to prepare; get your spiritual houses in order; this message is also for those living on a shoestring budget; whatever you can scrounge and buy junk silver (pre-1964 US coins; 90% silver); put aside a way to defend yourself; this message of financial freedom is for you whether you have \$1M or \$1 in the bank

God is with you; do not fear; do what you can to prepare and the Lord will do the rest

Do what you can to get precious metals while there's still time; getting harder and harder to acquire

**V's Response To Abn Dutch Bank Move To Not Honor Physical Delivery Of Gold To  
Their Clients**

March 24, 2013

Steve this is dangerous as you remember the BATS Exchange (the 3rd largest exchange after NYSE and CME) can not guaranty a Best Bid or Offer. So what does a toxic riddled bank like ABN going to offer when the market simply cannot guaranty it? Getting physical is getting harder.

SQ NOTE-THIS SHOWS THAT NO GUARANTEES ARE IN PLACE WITH THE EXCEPTION OF THAT WHICH YOU PHYSICALLY TAKE POSSESSION OF! IF YOU CAN TOUCH IT YOU OWN IT!

reference: Dutch ABN To Halt Physical Gold Delivery | Zero Hedge <http://www.zerohedge.com/news/2013-03-24/another-gold-shortage-abn-halt-physical-gold-delivery>

<http://tiny.cc/h6kquw>

## **V's Cyber Attack Alert 3/29/2013 -You Are Not Facing A Financial Haircut But Financial Decapitation!**

March 29, 2013

Ten months ago a massive powerful bank hack hit over 206 banks worldwide simultaneously siphoning billions from customer accounts. It went underreported and unnoticed by main stream media. Six months ago NatWest/RBS online banking and ATM went offline. Millions had trouble accessing their funds. A few months later online banking and ATMs from some of the biggest names in banking in the US started to receive DNS error messages and were knocked offline completely or were limping along, causing millions a hassle and head ache to get their funds. Two weeks ago Chase had an "issue" with their online banking computers as well as their mainframe servers were hit by some "problems" that caused thousands of their customers bank accounts to read \$0.00 as their balance. Millions of others had issues accessing funds and ATM'S from the house of Morgan. Last week the entire banking network of South Korea went down for hours, millions of customers were not able to access their funds, use ATMs or even check their balance. This week the entire Internet teetered on the brink of collapse as SpamHaus was hit by over 300 billion bits of information per second. That is what we are led to believe and that this attack was led by a rival company Cyberbunker. Whether this story is true or not, it does highlight the sensitivity of the internet. The overpowering pattern and factor here is that wherever you look in the world there are issues with the internet, networks and servers and it all centers around banking.

For some time I have emphatically stated that there will be a bank hack or cyber attack as the global economy is pushed to the brink of collapse. From top level sources I can confirm to you what you are seeing is an emerging pattern of various beta-tests using Stuxnet like algorithms to affect the banking networks the world over. I can tell you though that the primary target is the US. Look you can not have a bank hack a few months ago that siphoned over \$2 billion and hitting over 200 banks by some mere hacking group. In order pull something off like this I stated in a prior alert that this is something that can only be done by an Intelligence Agency working in close collusion with a Central Bank. After all you need to understand that various money and wire networks through which currency flows. Who but a Central Bank can give you the access and the backdoor for this to occur?

How can so many bank and ATM networks like NYCE, PULSE, PLUS, INTERAC, CIRRUS, BACNET, NOVUS all be affected? This is truly something of a very sophisticated nature. Something that is very large in scope and very ominous in action. Folks it is without a shadow of a doubt that these are all beta-tests. I have said it before this will be a financial false flag. The frequency of banking network failures has gotten to be very acute to the point that I am convinced that we are edging closer to the one major event that will set everything in motion. The take down of the economy is close at hand and the major cyber attack will be on it's way. These emerging patterns are a clear picture of an malevolent power play that will be done to bring the system crashing to it's knees. Things have gotten to the point of 'Critical Mass'!. Maybe that is why some of the top economist are right now panicking like never before. Get your cash out, keep what you need to pay the bills. Otherwise what you will be getting is not a 40% haircut, It will be a financial decapitation.

# V's Alert - 'The End Of All Things' - It's Not 'Cash Flow' But 'Crash Flow' (Tm)

April 3, 2013

As I sat in my living room watching global events unfold I felt like a movie goer watching a film that he has seen over and over again and knows the line, the plot and exactly how this ends. Better yet I felt like a passenger on the proverbial Titanic already in the life boat waiting for the Iceberg while the rest of my fellow passengers look at me with sheer curiosity and some with outright disdain. As I and a few of my cohorts scream with alarm warning to prepare for the eminent demise of that which is deemed 'unsinkable'. The passengers begin to rearrange the deck chairs. Some frantically still trying to upgrade to first class. Others clamoring for a room with a view on a liner doomed for destruction. Still others lined up for the meal service waiting to eat unbeknownst to them their last meal. This my friends is how and many like me feel.

I warn them about the demise and collapse heading into our very lives and path. Yet many of you ask me if I should buy a home? Some ask me what I should do with precious metals since it does not produce "cashflow" . Some ask me about 401K, Roth IRAs, stocks, bonds, commodities, etc....All for "cashflow" What CASH!? If you are in a paper position my friend you will not have "Cashflow" You will have "CRASH-FLOW" the direction and movement of a collapsing currency as it hyper- inflates to oblivion leaving you beggared and destitute. That is the term I coined ( Now watch some head at Forbes steal my line)'Crash Flow'.

Enough of the jests. Here is what I am seriously and I mean seriously concerned about.

1) The 38th Parallel Igniting on Fire.

For the last 60 years the Idiotic Dynasty of Morons called the Kims who have ruled North Korea have always blustered and bluffed to get their way. In exchange for rhetoric and showmanship, we give him aid. In the likes of much needed food for his brain washed starving masses who see these Ass-Clowns as gods. This time though it is different. This time there is something crazy about this generation of Kim. I can not shake the feeling that this is playing out to be a nightmare scenario. Here is what I mean and I hope you can see the patterns. Now follow along:

- a) Back in 2009 N.Korea detonated a "Super EMP device" one capable of blacking out the entire contiguous 48 states. The main stream media under-reported this and the "experts" written it off as no big deal.
- b) North Korean long range missile capability is currently in reality "unknown" Even if they do not have this capability it is still a moot point as I will show later. Thanks in part to exhibit "a"
- c) Many real "experts" the ones that you wont find on the MSM channels firmly believe that these lunatics have in fact miniaturized their warheads though they are far from MIRV capability.
- d) Their increasing nuclear testing
- e) The severing of the 1953 Armistice that ended the Korean War
- f) The severing of the one "phone line" from Seoul to Pyongyang
- g) Recommissioning of the Yongbyong Nuclear facility
- h) Constant threats and state of readiness for war.
- i) Chinese mobilizing aircraft, ships and troops on the border
- j) America sending in B52, B1, B2 , F22, and Agis Missile Destroyers and Cruisers

k) Satanic Hollywood making not 1 but 2 movies that showcase North Koreans as the enemies (Red Dawn and Olympus Fallen)

What I fear is a scenario playing out like this. America is a super power hanging by a string. You are only as strong as your economy and our economy my friends is very weak. Fragile to the point that the slightest trauma, or the slightest "Black Swan" event could trigger the end of Pax-Americana not in decade or two but overnight. We all know that the kings of the east along side with their allies have formed a counter balance to the tyrant that America has become. They are called the BRICS. It was announced last week and I warned about this. The BRICS nations(BRAZIL,RUSSIA ,INDIA,CHINA AND SOUTH AFRICA) have agreed to create a BRICS bank to counter weight the IMF and World Bank. This effectively kills the dollar. They are setting up an exchange that would allow the issuance of credit and loans with solid Gold being the reserve collateral. They are doing this and building the framework and purchasing all the thousands of metric tons of 'GOLD' using American T-Bills. This accomplishes two things. One it dumps their position on the toxic US dollar and two, it allows them to buy as much precious metals as possible. The end game of this is that the BRICS understand that the dollar is about to die as the world reserve currency. That is why today over 50% of the biggest economies in the world have stopped using it, moved away from it or limited severely their reliance on it. If you do not hear the death knell ringing then you are deaf as well as dumb.

Many have said that the Chinese and Russians are going to attack us at our weakest. Many envision and invasion force. I believe that they do not have to do that at all. All they have to do is fight us by proxy via the loose cannons of North Korea. All it would take is the right setting up or firing of a large scale EMP device smuggled in or fired close to shore from a cargo ship. It was not that long ago that a Chinese sub fired a ICBM off the coast of Los Angeles catching the Pacific Fleet with their pants down. Heck they can fire it from a fishing boat. The point is "ANY" attack can bring the markets to a halt and the economy to a complete crash. Again ANY attack or disruption.

The situation in the 38th Parallel also benefits the Chinese as dealing with the problem of the Japanese / Senkaku island problem. An engaged or EMP struck America will not be able to come to the rescue of their lackys Japan, or Taiwan for that matter. Japan is set to go belly up any way economically. The Abe reforms have failed and the Yen to Dollar index is still way too high thanks to the currency wars and a devalued dollar. It is sitting at 93 when it should be 83. Japan will try to start or get involved with any regional war in order to distract it's populace. Except this excursion will cost them everything.

## 2) The Middle East.

Need I say more? With the Asad regime change and the failed European colonization program called modern Israel (nothing to do historic/biblical Israel) crescendo into abject failures the West has to try more extreme methods. Look for the biggest welfare state in the region (Israel) to get desperate and initiate a greater regional war. This will back fire on them as their American ally will most probably have their hands full from licking their wounds from a Sino-Russo beating as well as civil unrest due to a maniacal government and a collapsed economy.

## 3) World:

Eurozone will be officially collapsed as the big money was out by end of June 2012.  
The Major Bank hacks will occur  
Bank Failures and glitches will become common place.  
Civil unrest among any and all that have it's dealings with Western Banking systems or Models.  
Total loss of all paper backed assets and wealth.

These are but a few scenarios that are headed our way. One is a very real potential (North Korea) The other is a definite: Dollar death and total collapse of the US and western economies.

May God help you all and please stop asking me about "buying a home".

# The V Files: The Last Hurrah: How to win the financial war being waged against you

V's 3<sup>rd</sup> radio appearance on the Haggmann & Haggmann Report, April 15, 2013

Hour 1 (9:00 – 10:00pm)

last Fri night (4-12-13) when he was watching the metals market: an alarming dump/dip; further dump when Asian markets closed; Sun in U.S. gold now in \$1400s, silver mid-\$20s à shock & panic; Mon 4/15/13

Told Steve back in Sep 2012: he knew they were going to take down metals (gold to go to \$1200 – \$1400/oz; silver \$20 – \$25/oz); at the time Bernake started “QE Infinity”; he’s mentioned metals suppression

Euro contagion get a lot worse; Cypress in the news; turmoil in France, Portugal, UK; they became the headlines; they will create a flight to the dollar; Ponze scheme for the past 40 years is coming to a head; everyone (not in the know) has tethered their boats to the dollar; major economies have untethered from the dollar; U.S. dollar will collapse and implode; the BRICKS will have the ‘least dirtiest shirt in the schoolyard’ Central banks dumping (selling) their gold because they have to pay their bonds; Ponzie scheme is up; \$650M short by Merrell Lynch did NOT trigger the metals suppression; Japan’s central bank dumping their gold reserves trying to inflate their way out of their depression (they’re going into hyperinflation and trying to keep their bonds going); others panic and then there’s a rush to the doors; major sell-off occurred in Asia disconnect from the population (Wall St. & Main St.); suppression and market change to cause fear; wealth moves from weak hands to strong arms; this is a yellow neon sign on the road of chaos; now they’re going for broke; we’re living in desperate times

currency swaps (Euro to Yuan) are happening between Chinese and Australians, French, etc; the BRICKS are setting up a rival bank to the IMF & World Bank; America is like the devil: when we go into a country there’re always strings attached (we’ll have control of your resources); the Chinese build stuff in other countries (doing things that are mutually beneficial); this tyrant has been running a shackling economic policy that’s sick and dieing; other countries will decouple from the dollar; 6 – 9 months very critical; the dollar is done, it’s over; the “death rattle of a dying jackal”; the U.S. economic system is coming to an end

suspects in the ‘death of the dollar crime scene’: Fed Reserve, Bank of England, ECB, Bank of Japan, Bank of International Settlements along with major banks

over the last 70 – 100 years in the US (acute in the last 40 years) there’s a 5th column with a lot of power; seated themselves in power steering a) foreign policy b) economics; funding enslavements of the US population; you’re in a giant Ponzie scheme; not free market; you’re a hamster in a jail cell, a fish in an aquarium; transferred wealth of the US into a war machine that has conquered and made it an engine of globalization; corporatism; fools in charge of Western Banking think they’ll bring about global government

V is a Christian; only religion where he doesn’t have to throw his brain out the window; there are cultures that are mistrusting; we have been sold out; they think along lines of power (no discrimination against nation or creed); they’re drunk with power; we’re on a fast train to an abyss

Steve: This is the last hurrah; destruction of the middle class; you don’t have a love for the truth; he said 20 years ago there would be a decoupling... (copy from his Alert); metals dealers try to stay in a neutral position; what happens when COMEX fails to deliver? End of metals market; metals go from refiners à distributors à

dealers à general public; amazed at volumes of metals being sold and very little physical coming in; all mainstream press is owned by the metals manipulators; true vs. digital wealth; only God can open people's minds and hearts; there will come a time ; manipulated fraud; stand firm and understand the fundamentals; SE Asia/Chinese/India/etc. are buying all the gold they can get their hands on; people don't want to take personal responsibility or accountability; people will not sell their gold or silver for less than cost of production or replacement; the pulpits are responsible; the economy drives your ability to exist financially; this is the reason why the middle class was destroyed (control them to control lives)

Most globalist guys were the punks at school who got sand kicked in their faces; V has access to gold & silver a little over spot; IGNORE THE SPOT PRICE (if it goes high, you buy; if it goes low, you buy); it's a store of wealth; gold are like life preservers; it will keep you going in the trouble ahead; the COMEX has raised margin requirements by ~ 20% (to prevent fraud/crash); everybody freaked out and dumped their gold; impossible to get back in the paper market; if you don't hold it, you don't own it; should you buy Bitcoin? imaginary currency; things are accelerating so quickly; understand the difference between currency and money; you get paid in currency (somebody else's debt obligation; means of exchange; perceived value); gold & silver are measures of wealth, means of exchange, money; fraudulent, fiat-based economy; you live in a nation that's basically a rigged casino but you wonder how you can make your investments and somehow get away scott-free, you think you're somehow exempt from what's happening around you; the system is flawed, demonic; enslavement and entrapment system; you have to get at real, hard assets (aggrigable farmland, gold & silver, firearms, medications, etc.), important for barter and trade; if you don't listen to this there's simply no hope for you; if you don't see this, you deserve what's coming; because now it's past the point of no-return

This is not the end of gold & silver, this is the end of fiat; this will be the greatest buying opportunity; this is your last buying opportunity; the majority have a herd/sheep mentality will follow themselves to the slaughterhouse; it's never the majority that gets it; the minority always screams & shouts about an injustice; the majority of Americans still don't hold gold & silver;

Why are we in the Middle East? It's not oil; the greatest asset/power we have is our banking system; what do you think we'll do in Syria when they're toppled? Set up a fractional reserve/fiat banking system; the Muslims don't have a fractional reserve lending system; oil is secondary; US has more oil in US than Saudi Arabia; how do you get power/enslave people? You enslave them monetarily; a banking system is a system of enslavement that can be used all throughout the world because it produces debt; borrower is always a servant to the lender; we go to ware over banking

Steve: the truth is foreign to those who live in a virtual world; our kids have abandoned ideals; word of God in motion; people choose not to believe it; wanton disregard for true history; getting people to act in their own interest; vilification of entire groups of people; central nervous system from your brain to your wallet; God want us to be free and look to him;

Hour 2 (10:00 – 11:00pm)

Doug's "DHS Insider" source: what will precede the civil unrest event? An economic collapse; you'll all participating in a Ponsie Scheme; US has been selling junk bonds during last 20-30 years; last 20 years: bubble in bond market; US has been borrowing money; we pay them in IOUs (US treasuries); US spending money like drunken sailors; spending and stimulating; countries are deleveraging; guess who's buying US debt nowadays? US Federal Reserve; 3 stool analogy holding us US economy: Japan, China & the Fed; this is the end game playing out; suppression in metals is the last hoorah before the crash; now they have a pretext for grabbing your freedoms, blaming the collapse on a crisis, speculators, etc

Steve: municipal bonds are a market that will never be paid back; they want you dead; trafficking in men's souls; ratting out neighbors, veterans, etc; God is faithful; if you knew how little time you have left you would weep under the living God and ask him to be merciful to you; do you think the Boston Marathon (little explosion) is anything? Wait until the big explosions; it's a big deal when people stand-up for Jesus; this is the countdown; read the book of Revelation; God is merciful; you all should be concerned with the Resurrection (not the Rapture)

What occurred today with metals is history; if you're not buying, what are you waiting for? Continued downward thrust of Japan; massive increase in currency wars; there's going to be a war; the numbers are screaming at me daily that there's going to be a conflict; every Keynesian model ends with a collapse or a war; they want to hold on to power; looks for BRICKS to flush out their banking details; watch South Korea very carefully; North Korea is a joke militarily; South Koreans don't like how US is dealing with the North; this crisis is being used to ram down F35 fighter planes down their throats; look for South Korea to walk away from the dollar; Japan is a US lackey (economically-speaking); Hundai cars are de-contented in the US (rest of world are getting the good stuff); Singapor; Latin/South America will be on fire economically; Argentina is on the verge of another revolution; economic downturn in Colombia;

Domestically: US stock market will go higher; will they hype the Boston Marathon bombings fear? All of chickens are out of gold & silver so they'll be a flight to the US dollar ("save haven"); Titanic (i.e. the US) will sink in next 6 - 9 months

Housing market: there is no recovery in real estate market ; 30M homes in shadow inventory; major real estate downturn / bubble will make 2008 look like a walk in the park; commercial real estate is about to pop

Next 10 days: gold & silver buyout ; dream come true for every contrarian

Jobs: worse & worse; not a bright picture

If you don't have belief in Christ to get you through this; there is no political solution to a spiritual problem; be prepared

Cozing-up between Russia & China: the US is the emperor without any clothes; BRICKS have to be diversified with precious metals, need to trade amongst themselves with their own currency; they've already jumped ship (off the Titanic); Canadians are looking to leave as well; Japan is finished as an economy; Germans are demanding their gold back from the Fed; Germans have spoken to the Russians and the Chinese and they'll set-up their own exchange with them; Arabians & Persians will come together; everyone is moving on great without the dollar; China doesn't need us, they used us; Indian middle-class has higher buying power than US; Chinese are in a position to replace the US; dollar will go into the trash heap of history

Steve: 4/22/96 Demetric Dudomen (sp?) the bible smuggler; 17 years ago dream: AK, MN, FL is where Russia will strike the US without warning; France & Germany have made secret deals to attack the US; it's not when your pension fails but when your life fails; truth of treasure will feed into truth of heart; V is in the financial area (primarily); his track record speaks for itself; some people have a hard time believing that America is Mystery Babylon; Canada is not a place of refuge for fleeing Americans; blitzcreig from the south, cut-off from the north

Hour 3 (11:00-12:00)

We've passed the rubicon; the Federal Reserve passed the rubicon; once again you starred at the tree and missed the forest; you're a day late and a dollar short; you missed the buss; lines have been drawn; we're on to the next

phas; it's too late for you; what's happening with spot prices doesn't affect physical inventory; spot market price is totally irrelevant; physical gold & silver is getting harder to come by; any hope? Psalm 37

Steve: any man that doesn't provide for his family is worse than an infidel; if you're not preparing and you know you're going to starve to death if you don't, what then is the difference between you committing economic suicide or practicide? Why do you struggle with the biblical imperative to provide for your family? V's track record speaks for itself; false spirit of religious piety that keeps a person from actively cooperating with God

Saving grace in Canada? They still have their version of a Glass-Siegel Act; US got rid of it in 1999; one of the kids with the cleaner, dirtier shirt coming out; good oil reserves; they'll definitely make it out ok

Market forces work on the basis of supply & demand; metals suppression doesn't work on supply & demand or market forces; too focused on the numbers; there are larger forces at play (national, international, deal-makers behind-the-scenes); gold & silver are being manipulated very artificially

you got to be able to compartmentalize your life; these are warnings are there to get you prepared; you need to really consider on what you need to do to better prepare your nest egg from being totally wiped out; this is also for the person who doesn't have a penny to his name; you can't let this thing get to you; you can't let the news depress you; everybody has a horse in the race (perfectly fine); you got to have money in the bank to pay the bills; you need to put a little away to buy precious metals; it's good to prepare; the signs are warning all around you; there's a timeframe to this; it's not a matter of "if" it's going to happen, it's "when"; it's a definite; it's a mathematical event that's going to happen (an inevitability); you can't let this stuff depress you; Why are you so sad that this world's going away? status quo going to be turned upside down; justice will be served; you can not do the heinous things that this country has done and not have God require of you retribution; it's the 5th column that's steering economic and foreign policy; it's mathematically impossible

Ireland has ~ 300,000 homes, 7-10M people; 40 years to re-fill them; US has 35M homes in shadow inventory (underwater, foreclosed, etc); 400 years to re-fill them; US debt: \$225T; next 700 years won't pay it off; should have let others collapse back in 2008; system would have purged; in due time the market would have re-set itself; instead they stimulated

Nearfield Communications; everything is in place (new digital system);

Steve: it only gets worse from her; the day will come when all income will be shut off; Resurrection takes precedence over the Rapture

# Sand Castles in the midst of an Economic Tsunami.-'V'-The Guerrilla Economist

April 24, 2013

When I was a child I was always enamored by those who take copious amounts of time building sand castles on the beach. I too parlayed my efforts into building these amusing and engaging edifices of one's imagination. The only thing though is that as one begins to build these great creations be it small or something of a very grand scale, it is only time before the tide comes in and washes away what one has labored so hard to build. The eldest among us understood that these creations of sand are only temporal but it is the children that have the greatest heart ache. It is almost world ending for some. Thus so it is with today's modern society, you have those that are awake to what is going on and understand that no matter what they build here in this life, very few things are lasting and even fewer stand the test of time. The other's and I know that some of you who frequent this site or are an audience to my warnings will understand. That there are some that feel with such strong conviction that their sand castle is forever. That it is venerable, a construct that showcases their abilities, their worth, and their legacy. Fools is what I call them.

This week we had the market do some incredible things. Hot on the heels of the Gold and Silver beat down that I predicated with uncanny accuracy, the DOW continues it's upward climb. Irrespective that IBM, CISCO, and Caterpillar all reported revised earnings much lower than what was forecast. Irrespective of the false flag attack in Boston (My advise to the FBI is please use better dim wits next time) continued job loss, a housing market reflation that is deflating faster than popped balloon, still the insane Plunge Protection Team, Hyper Bernankian Stimulation has caused every idiot with a room temperature I.Q. to dump his PM holdings, JPY and Euro positions and run to the dollar as the last bastion of safety. Folks this is the equivalent of a child not being able to register in his mind that the high tide is coming in and the fruits of his labor is about to be wiped. This time though it is not high tide but an inescapable TSUNAMI.

Today's news reported that because of a hacked AP tweet about Barry O's white house going up in flames. \$23+ billion dollars left the S&P 500 in three minutes. Sure and I have a bridge in Brooklyn that I can sell you. What this immediate sell off really is more than just a tweet gone wrong. Word is that this is how hair triggered the market is that such wild undulations will cause mass sell offs. Either these are the fastest movement of capital that I have seen or the Banksters are running some sort of test again. I would lean to that conclusion till I can prove otherwise.

What you have here on this chart (Courtesy of Bloomberg) is showing the incredible three minute short and the squeeze that has occurred in the market. Still this type of information is not enough to dissuade the delusional hopeful who are believing in a "turnaround". Look lets be honest some of you have dumped your silver and gold stores in a panic tizzy and some even have flown back to equities and a even a few of you ran to annuities. I have stated that this is a sting operation perpetrated by the BOJ and the Fed. Selling off and flooding the market with worthless paper certificates, working in collusion with their Bullion Bank henchman. I stated on the Hagmann and Hagmann show on the 15th of April that this will cause a buying spree in Asia and that is exactly what has happened. All the central banks are printing to oblivion, the politicians have committed to this madness and are in full support of a global currency war. In the process YOUR wealth Oh sand castle builder is being wiped out. YOU ARE ABOUT TO LOSE EVERYTHING IN THIS PERFECT MATHEMATICAL ECONOMIC TSUNAMI that is set to overtake you.

Once again the governments and Central Banks are walking lockstep with the Banksters in creating total centralization of wealth and vertical integration of capital power. Do some of you cry at night wonder why Barry O' does nothing to fix the economy. Do you wonder why it is nigh near impossible for small business owners to function and for new ones to start up? Have you ever thought why there are crushing taxes that seem to benefit only a select few at the malaise of many? Think about it. They have killed private wealth to the point that those in the western economies can do nothing but run to their respective government bonds or even to the the US Tbills and Dollars. Sad is it not? That this is the environment that is purposely been created. This is done in order to tether all of those that are in equity distress to the Dollar, The USS Titanic. A ship so overladen with excess debt that not only is it about to hit a Iceberg but a Tsunami as well. You see the plan is to create the panic, and get everyone on board and then sink the ship with all hands on deck. Total LOSS OF LIFE!!!! Who but rank and file communists would want total destruction of private wealth?

So how do you escape. I have told you and will again beat it over your heads that the way to escape this Satanic System of Enslavement is to be Filled to the brim with Gold and Silver as well as food and a few other preparedness items necessary for barter. I stated many times that paper certificates show no bearing on actual physical market/inventory. The GLD/SLV dive in the sport market last Friday was the signal to people like me that the de-coupling between futures prices and physical metals acquisition prices, that we have been preaching about in the metals market has finally begun to take place. Today there are hefty Premiums that are being paid and delayed deliveries up to 8 weeks. Renaissance Metals that SQ, runs is one of a handful that can get you what you need. Renaissance goes out on the Secondary Market to acquire what you need. The precious metals pool of supply is running even lower with recent mint shutdowns of production for certain stampings, which has done nothing to alleviate the situation. So get on with it. Pick up your pail, dust off your tush and settle it in your heart, that what you built is a worthless pile of sand and get yourself into something that has stood the test of time for over 8000 years. Get Gold and Silver while you still can. Price is no longer the issue as AVAILABILITY AND DELIVERY TIME BECOMES CRITICAL!

Be Prepared,

"V"

## **Heads Up - V's Sense Of Foreboding Over Cyber Attacks, And Japans Precarious Position**

April 26, 2013

Steve this is troubling. With all the physical vacuuming of PRECIOUS METALS in the past few days, I sense that apart from covering losses, the "Too Pig To Fail" banks are prepping for a cyberattack. Look the physical precious metals has been shaken from the weak hands and in the process, transferred to the strong arms of the Central Banks and the "Zombie Financial Collective" who have off shored, mega tons of gold and silver. What has been plundered is never ever meant to cover contracts. So if the hard real money is out, what is left is pure rigged fiat paper primed and ready to blow. Who is first? JAPAN?

## **V's Latest: Germany is facing another 'Weimar Republic Meltdown' - U.S.PONZI SCHEME IS BEING REVEALED FOR THE TRUE FRAUD THAT IT IS**

April 28, 2013

This week the hottest topic I feel and one that really ties in the Euro Zone, the metals beat down and the Ponzi scheme of the US/ Fed Reserve system is the admission in a very subtle way; that the Fed has no GOLD to pay the Germans.

This is a huge issue one that many do not know the magnitude of. You see the Germans are the least infected of the Euro Mafia Cartel Contagion. They have also realized that this La Costra Nostra is a crime family that is losing control of it's operations, with members like Spain and Greece totally failed and the Italians following suite close behind.

The Germans know in the midst of a Euro Collapse and a population that has far grown disenchanted with the European Superstate, brimming over with nationalistic fervor; it will be suicide to go through a Euro Collapse and domestic upheaval at the same time. It would spell end to the German power brokers and as alluring as it was for them to be beneficiaries of the Euro initially, it has now become a pain and a death sentence. So the choice that they are facing is this: Go down with the Euro and lose everything or hedge yourself for a Euro Collapse and come out with the reigns of power in tact.

Merkel's party is losing big, in fact any politician running on a pro-Euro platform is assured a swift and speedy defeat. This past week the Germans have demanded there gold back from the NY Fed vaults. To say that the Fed was stalling would be an understatement. They have used excuses such as there are "too many tourist/ visitors that security will be an issue" to l"t would take us up to 2020 to start delivery."

So the 52 million ounce ( German Fed holdings are approximately 1500 metric tons) question is where is the gold? The short answer to any of my German readers is that it is gone. For years German central bankers and politicians went by the simple word and written assurance from the Fed that their Gold is safe and sound. This however was simply based on the 1979 bar list and audit done by the Fed. The proverbial fox guarding the hen house. Now it would seem that the fox has eaten all the chickens but the farmer is finally awoken to the fact of his mistake.

You see in order to prolong the Ponzi scheme that is the US economy. The ones who run the scheme must make some sort of payment along side promissory notes thus there has been an agreement to repatriate 150 tons of Gold back to Germany for the next three years. Breaking that down that is 50 tons a year. A mere Ponzi payment in the grand scheme of things. The main thing that readers need to be mindful of is the fact there are not only countries that are crying for the repatriation of their gold but states within the US are demanding the same. The first one that come to my mind is Texas. This demand is going only to increase, so what is a group of criminal mad men to do ? Simple. Destroy the value of the very thing that the sovereigns are clamoring for: gold and silver spot prices. I was the only one to predict the gold and silver suppression to the exact numbers that they are now today. Here is what is going to happen next: the suppression looks like that it will continue at least till the end of May. There is a major reason why JPM has divested itself of it's bullion holdings. All over the western banking world certain central banks in conjunction with multinational banks and elements within

the BIS (Bank of International Settlements) are moving PM's into the hands of select individuals/ organizations. Some nations are not on this list and Germany being the envy of Europe is not on this list. This is a move that the German power brokers/ elites are aware of and are fuming mad over it. This is also the primary driver of the warming of relationships to Russian and Chinese elites. The Germans are a strong and resourceful people they can only tolerate being fleeced for so long, it did not work after WWI with the treaty of Versailles and it will not work today. Look for a major nationalistic fervor when the German public wake up to the fact that their elites already know...That the Fed does NOT have their GOLD!!!

The few gold shelves that was shown to German bureaucrats to assuage their fears of missing bullion are gold covered TUNGSTEN bars!!! That is the truth and the Germans are suspect of it. It will be interesting what and how things will transpire in Deutschland but one thing is very clear. The charade that the Fed and US bankers/Financiers have been playing CAN NOT CONTINUE MUCH LONGER. The only way for them to make it out of this mess is an economic collapse. This way they can default on their debts and in the ensuing chaos pilfer the gold and silver with a promise to pay it back...One day. Again look for a continued suppression, for the next time you will see Gold and Silver shoot to the moon IT WILL BE IN AN AMERICAN FINANCIAL COLLAPSE, the domino of which will be Japan. There is a reason why the Japanese are heating up the rhetoric with China over the disputed islands in the South China Sea. It is a play of Keynesian desperation with the lie that war is good for business. This will be the last conflict they will have, if the Japanese decide to embark on that path.

Preventing another Weimar Republic is the mission of Germany, being the 3rd largest Gold holder in the world with a desire to grow that inventory will be the thing that will keep them afloat in the coming storm. The wheels are coming off the American Ponzi scheme, every week less and less nations believe our lies. We are running out of peoples to lie to and we are being seen for the con artists that we are. I don't like giving time tables as it is very difficult but the next ten months are critical.

Be Prepared. V-THE GUERRILLA ECONOMIST

# The V Files: How to Survive The Coming Storm

V's 4<sup>th</sup> radio appearance on the Haggmann & Haggmann Report, May 1, 2013

NOTE: There were technical difficulties during the radio show and if you listen to it (first 33:50), you'll hear how garbled the audio recording is. I did my best (below) with my notes despite this difficulty.

If only 10% came true then you have a LOT to be worried about

He was once an atheist; he was led to the Lord through his analysis

Christians are inoculated to be disconnected from reality

The real motivation for what they (V, Steve, Doug, etc.) are doing is not money; there are other things they can be doing that are far more lucrative than coming on the radio and warning people; they're doing this because of a calling; everyone's under the gun

The Titanic has already hit the iceberg; it's beginning to take on water; people are just rearranging the deck chairs

Motivation for what they do: this time it's different

this is NOT cyclical; 17/17 nations in the EU are in a meltdown; 100% of the Eurozone is in trouble; Spain's real unemployment is in the mid-30s; 50% for college-aged kids; dumpster-diving to get their next meal; UK is a time-bomb: all overleveraged (e.g. 1 bank alone \$72T in debt)

what you're facing is not cyclical; it's an end game, a financial time-bomb

Japan: facing skyrocketing inflation; cost of food items going through the roof; customer confidence has collapsed; BOJ printing to oblivion; US is doing the same thing; mathematical inevitability that this ship is going to sink; BOJ buying derivatives

If you're living in a house, live in it; don't worry so much about your mortgage; stay where you are; if you're renting, continue to rent; Spain has squatters

Get gold, get silver; gold & silver shortage; premium that dealers are paying right now to get physical;

World going to hell in a hand basket; American Christianity is clueless; the church is asleep at the wheel

Currency vs. money: real money for people for the last 6,000 years has been gold & silver; there are things very critical for you to have right now; people are waiting 6 – 8 weeks for delivery; call Renaissance Metals to get what you can while you can; food stores; get your spiritual house in order; you're going to see a lot of things transpire;

BRICKS world bank

Over ½ of largest world economies are divesting out of the dollar

Your world and your way of life is soon coming to an end; the way things always been – business as usual – is no longer valid, no longer the same; unless you prepare

Watch Germany; asking for all of their gold back; most of gold shown to Germans at NY Fed (51<sup>st</sup> St & Liberty) underground: not real gold bullion bars! It's gold-dipped tungsten; the Fed has NO gold; it's already moved into other hands, organizations & places; they're getting ready for a collapse; before a collapse occurs you'll see movement of real, tangible, worthwhile assets; flights from dying currencies to strong currencies, dying banks to viable banks, swings in precious metals (moving from weak hands to strong hands); total concentration of precious metals market, wealth into the hands of a few THEN the collapse will occur

June 2012: Euro unofficially collapsed; official collapse will soon transpire; world is in a total depression; Eurozone is hemorrhaging; 40-1 overleveraged banks; US hasn't faced the full brunt of it yet (we're the world's reserve currency); time clock is running out; countries not wanting to buy our debt; US is running out of people to lie to; nobody is believing the US dollar is a safe haven except morons

Dow will hit 14000-15000 how? Fed printing press; so much money flowing out à stock market; artificial fools' rally; they will try to inflate the real estate bubble; 34M homes in shadow inventory; bank subsidiary V worked for decided to cut staff from 2-3k to 150 à robo-signing scandal; purposely bottlenecked the system; if they allowed 34M homes to hit the market à collapse the real estate market; it's not the time to buy a house; bubble will burst; we forget the damage and destruction that bubbles cause; Keynesian loony tunes running the West; when the inevitable crash occurs they'll have their wealth preserved; you'll get a haircut and a decapitation as well

there's going to be a coming bank hack; banks the world over are becoming more lax with their security (doing it on purpose); DNS errors; online banking & ATM problems; they are purposely weakening the banking networks; when cyber attack (and collapse) does occur they will be making it out securely; 80% of Americans stand to lose EVERYTHING unless you do something to protect and preserve what you have and what little you have; this is for everyone (rich or poor); you need to make preparations now; time is short; wake up; Christians are about to face persecution now; the fires of economic turmoil are already burning; you're being attacked from all sides; his predictions are not hyperbole nor alarmist; unless you wake up and do something you're going to wake up beggars, with nothing, SWAT team in front of your house

future banking system: advanced technology; new digital currency system; future bank loans will know SO much about you and your habits; your job, travel, etc.; what the bankers have planned for you you'll yearn to live in Hitler's Germany, Stalin's Russia, North Korea, etc; wake up and take action; "catastrophic" is an understatement

Steve: realm of denial "insane-icycle"; it's happening because of the cowards in the pulpits; minimalized, marginalized; stand up for Jesus (prayer, fasting, calling) because your life depends on it; Pentagon will court martial Christians; you are in a battle for your and your children's' life; Steve's own kids are oblivious to what's going on; you don't need to be afraid (willing to die for your faith); will you stand up?; this is a matter of life and death; it is so late in the game; information can't save you; there is an eternal hell; this is about getting people to grow up into Jesus

he used to be an atheist; Japan is imploding; Japan will be the catalyst that will bring down the whole house of cards; the emperor (the U.S.) has no clothes; if you don't have a relationship with the Lord there's no hope for you; deep connection with God; doesn't know how many alerts he's sent to Steve (EDITOR'S NOTE: I do! <http://tiny.cc/b2tziw>); the ship is sinking – it's already happening; you're going to face some of the hardest times; some of the toughest times in the history of America; the economics behind it is the scaffolding of this thing called the New World Order, the infrastructure of the new economy that's coming; we are headed to a massive collapse; any given day we are just 1 crisis

away from total collapse; 1 black swan event from total chaos; imagine the vulnerabilities of the system (cheap money, easy credit); biggest bubble ever created; when it pops, 80% of your wealth will be wiped out; you will become homeless; you will have no options; somehow you've lied to yourself; there are some hardships coming;

top Congressional leadership (of both parties) are bought & paid for; they know what's going on; coercion and subterfuge to get their agendas passed; others think this gravy train is going to continue; they think the party's going to go on; they think that America is somehow exempt from history and judgment; Bernake & Diamond & others they'll be out of the market and in their safe houses ~ 2.5 weeks before this thing comes down

how many of the top traders, executives of banks all have guns, food, safe houses, gold, silver? They all do; they're already ready; safe houses located in South America, northern Canada, eastern Asia (China), northern Africa; that's where these guys are going to scatter to; once chaos subsides they're come back as saviors to implement their new system, new guy; new economic infrastructure; not even their assistants will know where they're at; it's going to be a Friday when it happens, middle of the afternoon when they pull the plug; markets will be shut down ~ 12:00 – 12:30pm; collapse will be so quick; immediately deploy troops to NYSE, NY Fed, JP Morgan gold & silver vault, Fed Res areas throughout US, Ft. Knox

Steve: you wonder why they call you zombies: you're the walking dead and you don't know it yet; people will eat each other (cannibalism); the bible is clear on lawlessness; 20 years, 9,000 hours; this is the most critical time; you need to repent; we're in the countdown phase; the spoils of war; Boston had helmet cams (they come in shopping ahead of time); FB: you're being cataloged & being put into algorithms; you're going into captivity; why don't cops have ammo? They're on the blue list; 16 years ago someone gave Steve the Red, Blue & Green Lists; 1<sup>st</sup> people to go? Doctors & nurses; unfaithful steward; Steve has turned down some customers who don't have enough money to buy metals because they should buy other items (e.g. food) instead; stand up and act in your and your families best interest; "fear monger" is NLP from a Fed or a skill; if you're listening to mainstream media you're already mind controlled;

How many times does V have to come on the radio? He predicted that gold would plummet to \$1,200 – \$1,400/oz; we're screwed; V is married; he's one of the most ripped-off guys on the Internet; his predictions (verbatim) appeared on WSJ, Bloomberg, Forbes; you have to prepare; you have to get your spiritual lives in order; the next 10 months are going to be critical; we're moving from what's been predictable to a very unpredictable time; get yourselves ready; he's been working w/Steve Quayle on something to really help people out in a very personal way; be prepared; where is your heart at right now? Moving towards God? Wanting to break free of the things that hold you?; V likes mentoring young men; the real men are gone (spiritually castrated or lobotomized); US' biggest exports? Porn & recyclable trash; societies & church's divorce rates; if you're struggling with any kind of addiction: you have to learn to outlove your sin; you got to shake free; you're going to learn how to love Jesus more than your sin, your family, your finances, your future plans, etc; when he looks at trends & numbers he only sees that we have 10 months; next 10 months so critical; Europe is going to die à spill over to the US; Japan is the catalyst (220% GNP-to-debt); bigger war? Another rally? Another bubble? Inflate our way out again? Never before has the world seen such levels of debt; this is not a cycle, this is a cataclysm; this is not a trend, it's a slaughterhouse; this is not a blip on the radar, this is a cliff we're speeding over

you need to decide what you need to do; there's a lot of prepping going on; they're going to come for whatever's in your house; hide it somewhere (in another location); difference between currency (someone else's legal obligation; somebody else's debt) and money (gold & silver); when you put money in a bank that money's no longer yours; bank is in all legal right to wipe out your bank account; 60% of Cypress people had their bank accounts gone; you don't have any money (in the eyes of the bankers) because it's not your money it's theirs (legal obligation); when you deposit money in

the bank you're giving a loan to another institution with someone else's legal obligation; it's not your money; just don't pay your property taxes and you'll find out who's house it really is; you don't own anything anymore; they've swindled you; in order to live the American Dream you first have to fall asleep; you have no legal rights to your money if you deposit it in a bank; it's all a scam; you're being scammed on all levels; the only way you're going to circumvent the system is you gotta go outside of it; none of it is yours; the only thing you can own that's really yours? Precious metals, real tangible assets, food; understand how to live and operate in the system, how to circumvent it, personal wealth and family quality of life is not tied to it

metals confiscation? They might try to; extremely difficult (logistically); in 1933 the populace gave them up; smart people buried it; logistical nightmare to round it all up; bankers & Fed have bigger fish to fry (e.g. firearms); if you're off the grid, flying under the radar: they're not going to bother you; won't waste time & manpower; task too huge to tackle; they might put out a warning; buyback program; stupid people will line up and turn in their gold & silver for paper fiat for a fraction of the value of gold and silver; they won't actively go and round up everyone's precious metals

Steve: they're not coming to take gun owners' guns away; they're coming to take the gun owners away (blowing them away); MF Global; so much is being taken out of the COMEX; Steve made his money buying and selling on the metals markets and practiced what he preached; Gary gave Steve the red/blue/green lists; algorithms and given amount of people; US Military is being destroyed; you're going to lose your precious metals if it's being stored on your behalf; 485,000 prepositioned Chinese, Russian troops; physical captivity (taken away; prison camps in Arctic); you're playing not only with your life but your wife's, children, grandchildren; in Steve's family: only 2 out of 12 "get it"; there are more believing women than men; they will confiscate the metals when they come for the guns

7/2007: V heard what they were going to do with the market; from 10/2007 they'll take the market to 14,000 and then pop the subprime bubble; ask for more bailouts and more vertical integration; to call this thing a 'rigged casino' is an understatement; it's the most devilish Ponzie scheme ever pounced upon humanity in history; banks going out of business; shotgun mergers; they allowed Bear Stearns to go under and allowed others to take over; suppression of gold & silver markets; derivatives; this is something planned and orchestrated; they're not stupid; recurring pattern of it happening over and over again and those same people causing the problems are getting more powerful and stronger; this is a planned and orchestrated take-down of the US economy; we're in it; the next time we see gold moonshot to \$5,000 – \$6,000/oz, \$500 – \$700 for silver à economic collapse;

We didn't have the debt-to-GDP ratio that we have right now; monstrosity of derivatives; wars; reckless spending; this will make the 1929 collapse look like a Sunday school picnic; 90% of people in 1929 lived on farms and 7.5M people starved to death; today, 97% of people live in cities/suburbs; people will starve to death; small children dumpster diving with their parents in Spain, Greece, Portugal; what will drive people really over the edge? When they feel hunger pains in their stomach or when they're kids cry with hunger; level of chaos unlike any other time in history, very horrific; have a second zone to go to (2 hr away); man is not designed to live far from his food source; population will be culled; after the collapse occurs it'll be 2.5 – 3 years of mayhem; create as much psychological trauma; they know you can handle 6 months if you know how to ride it out right; after a 1 – 1.5 years you're going to start cracking a little bit, by the 2<sup>nd</sup> year you're nervous; after 2.5 – 3 years you're begging for mercy; they're going to let you sweat it out; they're going to turn up the pressure cooker for at least 2.5 – 3 years

Are there any defensible positions against the dollar; they want a currency on par with much of the third world; cease industrial development; deindustrialize America; goals: never to allow a nation (like America) to ever rise again; kill off

sovereignty; global integration into macro-clustered cities and locations throughout the world; one, global currency system that is tracked and ubiquitous, everything is linked, every habit they know (you are what you buy)

Psyche of the male mind: we're still a hunter-gatherer mentality; men have become dumbed-down; if men did what they're supposed to do; lack of good men; most of these are frat boys high on coke – that's who's running the show; if real men were around none of this would be happening; most guys he knows are a bunch of porn-addicted punks; one of the most powerful books he read: Think and Grow Rich; sexual transmutation; sex drive most powerful drive; successful people focused their drive on building their businesses & achieving their goals; they make sure you're bombarded with sexual imagery; they prey to your carnal instincts; if you're distracted you emasculate yourself; definition of a man is someone who's responsible to his community, family and is an outstanding citizen, someone who rises to the occasion, wakes up others to threats; men are dead, women are captivated; if men can wake up to what's going around you, you can put a stop to it, slow it down

How soon would a gun-grab occur? Will disarm the law-abiders; those who are dumb enough to register their firearms, when the collapse occurs the plan is to come and disarm you; they'll make sure every gang-banger is fully armed; they'll create as much animalist chaos as possible; when inner city punks are armed to the teeth the body count on our side will be much higher than on their side; they need this chaos so that we can beg for mercy (after 2.5 – 3 years); organized people à neighborhoods à communities à defend their resources against roving street gangs; they're not just going to disarm you, they're going to kill you; how many different ways do I have to tell you that you're screwed?;

This bubble-gum economy is so volatile; AP's Twitter account got hacked; 1 tweet from AP à \$24B escaped from the S&P500; there's nothing of real value or volume in the marketplace; natural or man-made catastrophic event à decimate the marketplace; big boys got out of the Euro in June of last year; their plan was to get everyone on board with the dollar; pop this whole thing: create hypervelocity in Japanese marketplace; these guys want to get as much hard assets as possible; when Greece fell, billionaires & corporations bought infrastructure from pennies on the dollar; the endgame is transfer of wealth (land, resources, etc.); the rest of us get herded into compact cities for the rest of our lives; there is no transfer of wealth to South American only out of South America; if you don't hold it, you don't own it; don't but the Argentinean veneer; there is not one stable economy in South America (except maybe Brazil); problem with South American countries is that they're so socialistic; broken economies;

What about diversifying hard assets abroad? V has assets abroad that can't be touched and have high yield (only works if he has access to it); in trouble if you don't have access to it; when collapse occurs, banks networks will be down; most ridiculous capital controls you've ever seen will be implemented (no ATMs, no banking, no wire transfers); you're going to be SOL if you can't get to your assets pre-collapse

Steve: watch mid-Atlantic ridge, Iceland volcano, Canary Islands; massive desire to destroy as many people as possible; pressures are building; people will have everything that they take for granted taken from them (unless they're willing to fight for it); they're getting ready to play the 'alien card'; it's party-time for hell; what are they releasing to come fight us?; True Legends: Tales of the Feathered Serpent is his Steve's new book that's coming (content shook his cage); "If I've told you of earthly things and you believe me not, how can I tell you of heavenly things?"; if someone has to ask when is it happening? They're part of the borg; it's happening (now); you've got to become accountable; only go to metals after you've gotten some food

# The V Files: Reaching Critical Mass: What Goes Up Will Also Crash

V's 5<sup>th</sup> radio appearance on the Hagmann & Hagmann Report, May 14, 2013

9pm-12am ET (NOTE: V didn't come on until ~ 19:00 into the show)

1<sup>st</sup> hour (9-10pm ET)

Steve: int'l bankers & financiers devastated about the prospects of what's going to happen to their children; Fukushima: biggest cover-up event, children are dying from massive radiation exposure, so much radiation; 1/3 of the life of the sea is dying; 'end times' does not equal 'end of the world' but end of the age; "you ain't seen anything yet"; the end of this is NOT a political turnaround, it's a complete nuclear devastation of America; sitting ducks become dead ducks; 29 nukes were detonated/defused; suitcase nukes in America; they were hybridized weapons that were supposed to go off in 29 cities; before America is destroyed its sins will be revealed; nuclear threat is real

He's sounding the alarm; we have crossed the rubicon; market will go to 15-16k; beat-down of precious metals (\$1400 gold, low \$20s silver); stock market will be pumped up; if they want to pop it now they can do that; they don't have to bring it up higher

G7 meeting in London: 7 of the architects of derivative destruction; central banks to print to oblivion; they have no clue, no way of fixing this thing; Dow > 15,000 due to 1) unending Fed stimulation in conjunction with the Plunge Protection Team; 2) absolute flight from the Eurozone, Japan, Asian countries ("sucker investors"); system can't handle the volatility so they froze the Japanese bond sale; we are teetering over the precipice; Japanese insurance companies are overburdened with Euro bonds, now dumping them for US dollars; 3) suppression of the precious metals market to give people illusion that dollar is safe haven; people who don't know any better dumping their physical assets; transfer of wealth; the Stock Market (Dow Jones, S&P500, US T-bills (bonds)) rising because the Fed is printing; will the Fed taper down the stimulation? No; Fed can't exit this thing gracefully because 1) the whole thing will come down; 2) not in their best interest to stop stimulating; these guys are criminals, no honor among thieves;

lessons of 1929 & 1933 stock market crashes: monetary contraction- printing then contracted it; today's situation is much worse because 1) Glass Seagle is gone; 2) never been so vulnerable than right now (70% of economy is consumption; we don't produce/make anything); 3) financial instruments (derivatives, credit default swaps, etc.), \$1.5Q derivative debt; banks have more debt than countries!; Deuchebank will go belly-up, their derivative debt alone (\$72T) > global economy (GDP) (\$66T); stock market high: all insiders are dumping and all suckers are buying; this time you'll see things you've never seen before

naïveté of the population; top-tier powerbrokers are all in on it, all connected; orchestrated & controlled implosion; the next 10 months will be highly critical; you don't have until 2015; all Keynesian models end in a collapse or war; the markets are screaming war; current administration facing massive scandal, massive problems on all sides; the veneer is coming off – they're going to do something; US is funding Al Qaeda in Syria (they're not Syrian); massive pressure everywhere you look globally

AP Twitter account hack resulted in \$24B evaporated from the S&P; marketplace is so fragile; the market is not based on reality, it's based subjectively on perception alone; banking, monetary, lending, financial, trade, exchange, FOREX, COMDEX systems are stressed (never seen it like this before)

Steve: looming war in Syria; when goods don't cross borders, armies do; V has a family; give you best foundation of knowledge possible; we're teaching you to fish, not giving you a fish; elitist attitude: people are expendable (Georgia Guidestones: 500M worldwide population goal); Spanish Flu dug out of ground from AK will be used to create a biological weapon (with smallpox and Ebola); before they kill everyone they want to pick your pockets (blow you away and take your stuff); the timetable for the war is escalating dramatically; stand-down and sequester orders

Defense analysis: V knows all about weapon systems; he does strategic forecasting: what weapons does each side have? Stratfor hack last year: top members emails were released by Anonymous (including V's!); Chinese lack credible jet engines; the same disease that has overtaken banks, the underlying motive is profit; defense contractors make money by selling weapons & technology to both sides; Russians have phenomenal aircraft; F35 Lightning II (Lockheed Martin) is a failed project but they're continuing on; in 2008 US did an exercise w/India with their SU33MKI aircraft; our F15/F16/F18s

couldn't compete with the new Russian hardware; Indians had a kill ratio of 8:1 (they shot down 8x as many aircraft); a superpower is only as great as its economy; US economy for last 10 years has really fallen apart; US is superpower going broke; US is economically, militarily weak; US has lost Germany's gold (pretty serious)

Steve: Germany & France will be our enemies when the war comes; nations that have had their gold plundered and pilfered are not going to come and take a spoil; payback will so be quick and furious; foreign military are currently here in the US; Russian suitcase & backpack nukes; cyberattacks will take everyone's money out

We still have the best airplane in the world (F22) for under 20,000 ft; best tank in the world: German Leopard II; our aircraft carriers are vulnerable from Chinese & Russian missiles; US is at a disadvantage in every aspect; US has been scaling back our nukes; we're being defanged; we're not the unpenetrable fortress; we're more vulnerable now than ever before; it can happen ANY DAY NOW; we're holding on to a string (thinner than dental floss);

2<sup>nd</sup> hour (10-11pm ET)

Steve: V is a defense analyst; if you control the media, you control the flow of info, you control conclusions that people draw; only 1% of the US buys gold & silver; what you're being exposed to vs. what you can fight; take it to the Lord in prayer; an orgy of destruction is coming; there is no political solution to the spiritual rebellion; we are outlaw country; there are no more rules; there is no salvation; each man is responsible for his family's safety; there is a basic right to self-defense; acceleration towards the hatred of humanity; Genetic Armageddon; there are US military documents that validate stargates; "If I've told you earthly things and you believe me not, how can I tell you heavenly things?"; Dave Ramsey (and others) still towing the party line; you better be wiser; buy food before you buy silver; bottom line: the country's done; you have to be smart enough, strong enough and determined enough to find out who's telling the truth

There has to be some kind of global event that will shock people; 1<sup>st</sup> domino piece to fall: Japan; all these political scandals; Congress has lowest approval rating in history; people sense weakness; to say this is similar to Nero fiddling while Rome burned is an understatement; because of all the pressure building up the market is dictating that there has to be a trigger, black swan event; V respects Gerald Celente ("fellow New Yorker"); economically things are very tight

Straight of Hormutz: Iranians have capability to do it; once the market gets a whiff of this (based on perception) you're going to see a dump of this like you've never seen before; here's how it's going to go down: all too-pig-to-fails holding on the US treasury bonds (deal cut in 2008 during bail-outs); what do you think is going to happen to every one of those banks when fund managers gets whiff of tension in Middle East, Straight of Hormuth closing? Oil goes through the roof; they'll dump every single bond and move it to rapidly-rising commodity prices; oil will skyrocket for \$150 - \$200/barrel; halt to US economy; trying to jump into gold market; price of gold is the moonshine (\$5,000 - \$6,000/oz. for gold; \$700 - \$800/oz. for silver); why? because banks will no longer want to hold onto t-bills; they're trying to get out of the dollar; Fed will buy up all bonds quickly and quietly; they won't be able to; bond market will freeze up; Fed knows there's going to be a massive pop in the bond market because it's a massive bubble; every aspect of our economy is a bubble, it's fake, it's false; college loans: another bubble that's going to pop; biggest bubble? US dollar; when you're hearing reports about the slightest provocation, this whole thing comes apart very quickly

Steve: the things of your nightmare will become every day; the invisible is going to be made visible; we're telling people what's going to happen ahead of time; it's important that it gets disseminated; what Hawk has been trying to do over the years is get people to understand what's really out there; Trojan President; when you can't feed a gun what it needs to eat, the weapon becomes an expensive club; anomalous portholes opening; the war is intensifying; God is the one who empowers us; the power of God is present and resident in you to deal with the times ahead; God is going to pour his spirit out; 2-front war going on: physical & spiritual

Do we need an economic reset? No; economy and all drivers/indicators are being manipulated, steered, guided by forces that you have no control over; STOP BEING NAÏVE; reset is NOT a good thing; a reset is you in a FEMA camp, you in a new banking system without freedom, they're not collapsing this to give you a chance to uprising, to establish your republic; they're collapsing this because what they're bringing in is going to be hardcore economic tyranny, new system of total control, total tracking of every single thing you do; you're assuming it's going to work in your favor; you don't get it; you don't control the transaction environment, they do; buy/sell/save/invest; you think for 1 second they're going to give up their control? the difference between you and I is when I talk about a reset it's not something that's going to work out well for you; what I'm talking about is something wicked this way comes; you're living in a pipe dream; that's not going to happen; I'm here warning you to wake up, get your spiritual house in order; you can not survive what's coming unless you have a faith in God, faith in Christ

Link on Steve's site (banner on right-hand side): V - Guerrilla Consulting: "Trench Warfare" for the Financial End Times (brings you to Steve's Contact Us page; NOTE: \$500/hr (per the web site)); people with significant portfolios need some help; when you're a little leery about calling up Dudley Doright at Morgan Stanley; he'll show you exactly what you need to do; what is about to befall on this world is going to affect all of us; if you have \$1,000 - \$2,000 in the bank: buy food!; serious financial survival guide; I'll steer you through this mess; he's going to pray about it and then give you his answer; steer you through the total asset protection of what's to come

Steve: if you have wealth in the millions you're going to need V's advice; well-rounded; V's younger than Steve; V answers basic questions but if you need serious portfolio direction and guidance he's made himself available; this for V (Steve doesn't share anything); every nation's gold (just about, except China, Russia, India) has been plundered; they're going to find out the cubbard's bare; the assumptive risk in the markets, none of them are delivering in-kind (only in cash settlements); heads-up was MF Global; where do you think the government is going to go first? To the depositories; Steve always hired people smarter than him and with much more experience; put you into the realm of possibility; it is possible to take control of your life; drought and famine are here; the famines are coming; food, food, food; water, water, water;

3<sup>rd</sup> hour (11pm-12am ET)

Q: Canadian defined contribution plan (RRSP): withdraw funds and incur penalty?

Steve: Yes; 70% of something is better than 100% of nothing; depositors will cover losses of banks; you are going to pay the tax EITHER WAY whether you take your money out now; we're not talking about 'business as usual,' we're talking about financial warfare; you're going to lose everything; confiscatory policies and how fast they're going to steal your money; US debt: \$17T; American investments: \$17T; you don't have your money unless you get it out; if you can't touch it, you don't own it; depositories are going to get hit (so don't store your metals there); they'll go to the banks, bullion banks and depositories; things are not going to stay the same indefinitely; the cyberattacks on banks are coming, draining of all checking and savings accounts are coming; you don't know who knows what you have; take it, pay the penalty; this isn't a crapshoot

Real Estate Investment Trusts (REITs) 10 years ago? maybe; now? we're passed the point of no return, crossed the rubicon; anything based on real estate: a joke; you're living a lie; V lives in a state with a very strong law enforcement tradition, debt-safe pension plans: he's had law enforcement officers cash out, take the penalty; CoP \$400k/yr; patrolman \$150k/yr; anything based on a denominated currency is subject to failure; currency is a debt obligation of someone else; do you honestly think in a collapse you're going to be able to cash out? They'll give you a check, deposit it in a bank; THERE'S NO MONEY CIRCULATING; THE BANKS ARE INSOLVENT; the only way you're going to escape from the system is to unplug from the system: keep in the bank what you need to pay your bills day-to-day; the rest of it put into precious metals; he'll work with you to crash-proof yourself; if you don't hold it, you don't have it; if you don't see it, it's not there; depositories will be the first places raided; be smart; don't be in something that's destined to fail; you're a sitting duck; you're asking to get plundered; target painted on your back; if you don't do something soon, you deserve what's coming to you;

Should Doug Hagmann be concerned that when he tried to cash a check for \$5k that the bank said they didn't have that amount of cash on-hand? Yes; this is not a credit/liquidity crisis; it's a solvency crisis; banks are insolvent (they don't have anything); you'll be shocked to find out how many banks are going to the insolvency window to borrow money (e.g. \$10,000) to operate (meet operating expenses): what does that tell you? Uneasy alliance between banks and Fed; t-bills having life sucked out of them because of bond market, killing liquidity & causing insolvency in banks; story about customer told to come back end of the week because 8<sup>th</sup> biggest bank didn't have enough cash on hand

Wall St. is not the power-hub, it's London; City of London within London (10 blocks) where all major financial houses are; fractional-reserve lending was created by the Brits in late 1600s; Charles I did 1<sup>st</sup> gold confiscation in exchange for promissory notes; goldsmiths started fractional-reserve banking; Financial Times (ft.com); WSJ dumbed-down, watered-down version of FT;

Steve: City of London was founded by giants; the love of money is the root of all evil; coming angel wars (holy angels vs. fallen angels vs. wicked angels); Vatican preparing followers for 'alien intervention'; True Legends is the book he's writing; God put gates to protect us from them; knowledge is power

V's recommended books: History of Money and Banking in the United States by Murray Newton Rothbard; the freedom that we really fought for was freedom from international bankers; it's always been a fight against man vs. the central bankers; Socialism by Ludwig Von Mises; The Case For Gold

Steve: basic premise of survival is not to live as you're living now but to experience the goodness and the grace of the living God; get right with the living God; seek God; there is no strength within us to deal with what's coming; God is not going to abandon us; Steve referenced his wife; intentional destruction of the US military; Steve & V were asked to go on TV and they both declined

Time is critical; we've passed the point of no return; what can occur to bring this market down can happen at any time; next 10 months are very critical; economy is on a very unrealistic trajectory and will only end in the ruin of millions of people's lives; turmoil in Middle East; Russia drawing battle lines in the sand; drying-up of physical precious metals; all these models end in war; massive global event that will plunge global economy into disarray never seen before; all of this will transpire before 2015 (he personally guarantees that); if you need help no matter where in the world you are, V can help you; how to hedge yourself properly; better position yourself to barter, purchase & trade; we have crossed the rubicon; if you're still waiting for this market to turn around, waiting for this economy to get on the rebound it's not going to happen; 47% of this country is persona non-exist day (they don't exist); we're being wiped out economically as a nation; you need to focus on what you can do to hedge yourself for the times that are coming; so drastically different you need to prepare; prepare, prepare, prepare; the time for fun-and-games is over; settle it in your heart; humble yourself; prepare and hedge yourself for what is to come; have the faith and insight to see what you need to do to get through it all

# The Guerrilla In The Midst-What The Metal's Manipulators Have Planned-V-

May 22, 2013

It has been well documented by me that there was going to be a Precious Metals beatdown within the range of \$1200 - \$1400 per ounce of Gold and \$20-\$24 per ounce of Silver. Now the latest forecast from deep behind enemy lines was so earth shaking at first that I myself could not believe it. In fact I am still taking this with a grain of salt. From the inner recesses of International Banking, the Money Masters are deciding on a plan so daunting I do not even know if they can pull it off. That plan folks is to Smash Gold down to \$800 to \$1000 per ounce!!!! Silver between \$16-\$18 per ounce. Believe me they will market this as the much needed correction, they will trumpet it as the bull market run being over, thousands will dump what little they have in the open jaws of the Jackal Multinational Banks and the Central Banks that front for them.

I want you to be VERY VERY aware. This strategy while a last ditch effort to save the COMEX, FED and Bullion Banks will also have another driving benefit. It will drive out for good the speculators who have used the instrument of paper manipulation to dictate and affect the physical market for decades. The blowback of all of this is once again ever dwindling supplies of Physical PM's and acquisition premiums going through the roof. Folks what I am saying is if Silver goes to \$16 an ounce...do you think anyone will sell it in an environment in which there are dwindling supplies? NO! Of course NOT! This is going to be the beginning of the permanent dislocation of the Physical market from the Paper Market. I can see it now, ETF \$16oz , Physical \$40oz that looks like where we will be heading in the short term before the collapse finally arrives and PM's shoot to the moon.

Case in point. The Royal Canadian Mint just released a 1oz Buffalo Silver Commemorative coin at \$100 face value, the darn thing is 96% sold out! Whats the big deal about that you say? Well last year the same Canuk mint released a \$20 stamped Polar Bear Coin that never moved like this one. In fact SilverCoinsToday.com stated "Royal Canadian Mint appears to be at or approaching a sell out with buyers getting a perceived bargain by paying face value." Did you get that? Buyers getting a perceived value. So what's really driving the blowout sale of 250,000 coins 96% sold out in days? Simple...The thirst for physical silver all over the world has dried up inventories everywhere, thus causing people to spend up to \$100 an ounce and thinking it is a value!!! Why pray tell would the Royal Canadian Mint stamp a \$100 face value on a one ounce Silver coin? Are they forecasting something? I think so. I sure do.

Folks watch the movement of oil...Remember this is one of the big indicators and on a future alert/ radio show I will correlate the relationship of Gold and Oil. The two major commodities of any sane nation looking to trade. If Oil continues it's rise there are fund managers in the Too PIG to Fails that are licking their chops to offset some of the worthless US treasuries that they are holding. What is a poor central banker to do? Print to Oblivion I guess. Hoover town here we come.

Be Ready-V-

# The V Files: The Culling Of The Economic Unwashed Is About To Begin

5-24-13

(V, the Guerrilla Economist, comes on the show ~ 15:00)

Hour 1 (9-10pm)

Steve: \$1T European bank bailout by the Fed; digital representation of money in the bank is not the same thing as a commodity or as something you can trade; the paper market for metals is ripe with fraud; paper asset mode; the greatest illusion in the history of all majik: America's traded its heritage, assets, national parks, mortgages; what you think you own you better double-check; "due on sale" clauses on mortgages; V lives on the East Coast;

V's email address: guerrillaeconomist@gmail.com; time is of the essence; the Japanese have lost control of their bond market; they have totally lost it; stock markets rising due to bond prices; US collapse will be a trifecta of bonds, stocks and real estate combined; yields are getting higher and higher; BOJ has ordered all public pension funds to buy the Japanese debt; Fed has ordered US pension funds to begin to acquire US debt; moving into the last stages before the collapse; rubicon has been crossed; armies are surrounding the capital itself; Japanese don't know what to do (they're panicing); this is the trigger that will bring this whole thing down;

What exactly are they going to do? They're going to bring this thing to a halt, create an economic turmoil and crash, massive global war; a small-scale, controlled, regional war is not going to fix a \$1.5Q global derivative debt, massive levels of unemployment; they need to get all the players on the field, everybody involved will be affected; this time there's not going to be anyone unaffected; if you're still in paper, equities, waiting on the fence: it's mathematically impossible to pull this back; you can not recall this; this is accelerating; it's game over, there's nothing left to play; now, things are so severe they're not even waiting to create another bubble; they've created multiple bubbles; biggest bubble of them all: US dollar; the only reason why the Dow is where it is because corporations buying and selling their own stocks (they're not investing, hiring); this is the charade that's being played; the time is very short; if you are already set-up in another country (residence, passport, etc.), by all means, go; it's so difficult for you to expatriate; history just doesn't repeat itself, it rhymes

call Renaissance Metals (Steve Quayle) if you need gold, silver; another sign of the times: Royal Canadian Mint minted a 1 oz. silver coin with a \$100 face value; 97% sold out in a day or two; such a demand for physical silver people are willing to pay \$100/coin; Canadian Mint is forecasting something that many of us already know: silver to date if released from some of the manipulation, it should be ~ \$75 - \$100/oz.; silver and gold are getting rarer and harder to get; silver & gold suppression: plan is to take Dow higher and suppress gold & silver further (\$1000/oz and \$16-\$18/oz, respectively); IF they do that: 1) promanently divorce paper market from physical market (permanent severing); silver (now) ~ \$23/oz.; V contacted biggest bullion dealer in India: they won't let silver go for less than \$28/oz.; similar to ammo shortage: vacuum in marketplace, speculators are being driven out; they will be back and will come back in at a very high price; ~ 1 - 3% of Americans own precious metals; central banks, bullion banks, sovereign governments own most of the gold; real wealth is not something put on paper, real wealth is something that's stamped in metal

Steve: Russian (9k tons gold) and Chinese central banks purchased massive amounts and gold and silver; gold and silver always move from weak hands to strong arms; the people that are picking your pockets are the ones that are producing the shows; ancillary system that's already set-up, biometric tracking; quintessential locking grid that's coming; framework that exists to control; V was involved with that; everybody's got an opinion but what's there track record;

This is a brave, new world emerging; completely new beast; last 40 - 50 years: pure fiat (paper) currency; new system: lot more serious than what you think; "ubiquitous banking;" nexus of corporations, banks and individuals finance nearly everything; 1979: credit cards; online banking; mobile banking; Japan was where they beta tested mobile purchases; NSC will roll into smart card; new cards will have a smart chip inside; smart TVs monitor what you do; smart appliances; everything is designed to study YOU (social networks, Facebook); banking on a social infrastructure; drone (worker bee) process; "worthless containers" → "useless eaters" → "human resources"; ubiquitous banking is used to create drones who love their servitude; new credit score is going to be a 'person score': what type of loan, job, promotion, interstate travel, etc.; they'll give you enough to keep you asleep; this will translate into the chip; RFID dust (Japan was the beta tester); 'grain of rice' is the old prototype; smart meter will regulate your household temperature; you'll be allocated

number of calories which will limit your grocery purchases; lower carbon footprint; next big derivative scheme: carbon footprints; total awareness, total control, total tyranny

Incrementalism: boiling the frog (slow death); Google Glass is the future (they'll put that inside of you); you will see this in our lifetime; infrastructure already exists; started to roll it out on Wall St first (e.g. high-frequency trades); high-speed banking networks; they want the cyber hack to occur because the new stuff is going to be bulletproof; it's already here (e.g. iPhone 5, bitcoin, etc), it just hasn't been rolled out in full effect yet

Steve: atomic computing; the whole purpose of World War III is to destroy the image and likeness of God; Lucifarians are promising that you can live forever; you can live anyone's life; dehumanization (like Blade Runner); linguistic, sonic and sight programming to accept what's coming; the skills have been tasked with undermining them; the illusion must be maintained at all costs;

Hour 2 (10-11pm)

Steve: you're going to be exchanging your precious metals for things you need; in a black market, the way that barter's conducted; 99% of the analysts do what they're told; Steve pulled back on his IPO because they were going to pump-and-dump him; Valcambe gold bars (breakable chunks); silver is for food, gold is for your life; silver is your barter, gold is your savings;

With income: put 80-90% in metals and the rest in food; no income? 80% into food, 20% into metals; you want to make sure you're at least fed (esp. if you're the sole breadwinner)

Steve: food first; water; when the great quakes (esp. New Madras) occur, greatest migration will be over fresh water; if you're buying property, get something that has originating water on it; know the depth of it; anybody that tells you to buy a '72-hr kit' is out of their minds; financial integration into the borg; the Christian is a targeted individual for total destruction

The mark of the beast: the chip will work on a harmonic frequency (like your DNA; unique like your fingerprints) specific to you; coincide with the frequency of your DNA; the most secure system ever set-up; your DNA is a perfect conduit (radio frequency antenna); once you get the chip, it won't allow you to play; shut off portions of your brain to prevent you from getting angry, questioning authority; you're no longer a human, messed with your DNA, tampered with your ability to communicate with the Most High; we're going out in power and glory; the pre-tribulation rapture is the most dangerous doctrine, it's origins are occultic; the bankers financed this operation to get the church on board; coming globalization is not just a monetary thing; there's a spiritual part; false prophet is the religious system; people need to believe in something; new economic model will have a spiritual component (will not include biblical Christianity); alittleleven.com; you can not make it in this world without the Lord; the elites believe in God but they worship the wrong god (Lucifer); V's walked down corridors with conference rooms with big wigs having a Kabbalah session; they believe in a spiritual entity; it's mathematically impossible for humans only to bring this about; if you don't go along with this agenda you will be culled

What do you say to the mockers? Continue to build your ark; V has family members who think that things will turn around and get better; they have a 'horse in the race'; you're betting your future on it, you want it to win; horse represents your future, hopes, dreams, etc.; the horse in reality is dead but you're still beating it; you're so deluded, inoculated by the system that you think that the rotting corpse of a horse is actually alive and running; everything's not all fine; this whole thing's coming apart; "welcome to the club;" history is about people who, in the face of adversity, all of a sudden are able to stand up and become leaders; you're the type of person God put there, standing in the gap, for a particular reason to begin to guide people through the dark days that are ahead; we're not going to get raptured out of there; we're going through the fire; we're going to go through the tribulation because that's our refining process; we're not going to face the wrath of God (we're not going to be around); we're going to go through the fire to be purified; V does not learn much when things are going good; he learns best when things are going bad, trouble, trial torture; don't worry if people aren't listening to you now; the days coming when God will take away all of the securities until the only thing left in value will be him

Steve: God is a spirit; Steve was raised around gold; silver is a type of redemption; gold is a type of divinity; we are to become overcomers; the foreign troops are not integrating well with US troops; continue to pray; watch what God's gonna do; the scripture is not against self-defense; Steve has 27 year's worth of prophecies that he's read on talk radio

Hour 3 (11pm-12am)

The conditions we're facing: unprecedented in economic times; volatility and insolvency in all economies; these are the same idiots that back in 2006 said things we're fine; 2013: same idiots are telling you everything's fine; CEOs' insider trading is up 400%; you're not dealing with honorable men, you're dealing with master criminals and there is no honor among thieves; these guys are looking to pilfer you, take you for a ride and take you for all you're worth, then leave you destitute and leave you poor; that's what they have planned for you

Steve: the whole fallacy of the western economic world is based on interest; the whole world is being gathered together; Luciferian elite is to make war against Jesus; money is a spiritual thing; that's how the devil rules the world; he rules finance; kids are being neural-linguistically programmed and sonically transformed in their DNA; the mark of the beast will be so transformative

Japan has been one of the biggest bond buyer of US Treasury debt; no longer doing that; 3-legged stool analogy: Japan, China & the Fed; the Fed's buying at an alarming rate; US bonds will be dumped on the US market when Japan pops; commodities will fly in price (oil, gold, silver, etc.); all too-pig-to-fail zombie banks will dump their fund money into rising commodities; bubble in US bond market for decades; when Fed can no longer buy all debt themselves → massive panic; Japan is the fuse that lights this whole thing up, the domino in the bond market; they lost control of the 2<sup>nd</sup> biggest bond market in the world; in the process of going bust right now; it is the chief domino that brings this whole thing down

you think you're going to retire? The biggest scam they sold the American public is your 401(k). The 401(k) was never designed as a vehicle to retire upon. It was designed by investors and fund managers that wanted to create some sort of a tax-deferred vehicle for CEOs to park *some* of their money in for the time-being. And then companies got smart and said, instead of paying out these lavish pensions, let's give all our employees 401(k)s and sell it as something of a retirement-investment vehicle. And low and behold, everyone jumped on board this 401(k) nonsense. And now they're stuck. This is an absolute mess.

your pension is going to be vaporized; when the Fed is ordering most pension funds to start buying US debt...the majority of pension funds have already been invested with US Treasury Bonds; we're talking about politicians, career criminals; there's going to be nothing for you to retire upon; your pension is lost; V's told family members to take early retirement; V's dad is retiring, leaving the country; most people won't have that option; when this bond market goes bust, kiss your pension goodbye unless you do something to hedge yourself (pay a fine, fee, etc.)

what to do if you're locked out of your 401(k): it's just a stupid number on a stupid computer screen; if you want to know how, contact V (guerrillaeconomist@gmail.com); to save at least 50% of your 401(k); this is going to vaporize your pension funds, retirement funds; something none of you can afford to do

Steve: barbarism that's coming to America; people cannot accept what they can't wrap their mind around; this is World War III; this is going for the full magilla; take your closest threat out first; Israel will fight Lebanon and Syria; the only difference between denigration and destruction is a matter of time; veterans are going to be murdered; Luciferians are funding both sides; Steve's not a Catholic; Brother Bob's Vision: Steve waited 5 years to post parts of it; people cannot understand the horror because they live in La-La Land; hoards, gangs; the world's becoming more and more barbaric; you're going to have to take a stand; it's already getting tough, you just haven't had it come to your door yet; trouble's coming to look for you

You have no clue what you're facing; you have no idea what's really working in the backdrop of these events; what's it going to take to stop this? Pray & repent; reinstatement of Glass Stegal will stop lot of shenanigans from going on; there's at least 200 guys that V can name that need to go to prison and have the keys thrown away; that's how bad it is

Middle East has been one of V's favorite areas of study; Americans have no understanding of what's going on in the Middle East; V has Syrian ancestry on his mother's side; there's a huge Christian population in Syria; Wahabe Death Cult = "Al Quaeda" bankrolled by CIA, MI5, MI6; British banking created the Middle East and handed it over to the US; they haven't been fighting for 100s of years; never used to be any problems with Muslims and Jews; this problem has been intentionally created by British banking interests through British military industrial and political mechanisms that have carved-up the Middle East, created a problem and now it's our problem

Economy is a mess; we're in a volatile and insolvent world; what do you think these guys are going to do? V is Semetic by genetics; there are globalist plants inside the Israeli government (America & UK as well); they're going to try and instigate a war; Russians can knock out Israeli aircraft while on the runway;

Steve: Red Letter bible; Apart from God there is no truth; they're trying to bring us down to 500M people (per the Georgia Guidestones); wouldn't you rather go where the spirit of God is leading you – ahead of this – than to sit and try to duke it out?; the smallest pathogen is bigger than the toughest guy; supersoldiers have vulnerabilities too; you cannot fight spiritual wickedness with earthly weapons; China can sink the West without a shot being fired; we are at the verge of thermal-nuclear destruction right now; don't quit: it's not a one-time deal, it's an always deal from this point out; you can now email V directly

Time is critical; if you need help, email [guerrillaeconomist@gmail.com](mailto:guerrillaeconomist@gmail.com); he'll call you; for a small fee he'll give you a game plan on how to prosper; inventory is becoming scarce; it's only going to get worse

# The V Files: Financial Road To Hell – Paved With Masterful Deceit

6-3-13

(V, the Guerrilla Economist, comes on the show ~ 11:46)

Hour 1 (9-10pm)

Steve: tonight V will detail the next stage of the designed and timed meltdown of the Western World (not China or Far East); Western World is being intentionally and diabolically driven to total destruction of the middle class; ways of the financial system; rule #1: you can't spend more than you make (or you're bankrupt); rule #2: the world's debt is unpayable; you eat today doesn't mean you'll eat tomorrow

Things are happening so quickly he just had to come back on; there's so many thing happening at once; we're at a terminal velocity in the marketplace; we're entering the distress of the nations; every aspect of the system (esp. western banks) has great stress, anguish; Western banking has become its own Tower of Babel; what was once a model of freedom, wealth, growth has now become just like the Tower of Babel, place of destruction and confusion; if you don't know what's going on now you're confused; if you don't understand what I tell you; wake up! Things are really coming to pass; this is not a time for you to have your head buried in the sand; this was a big week: Japanese bond market spin out of control; they have lost control of the bond market; hottest trend: short sellers; Bank of Japan (BOJ) is going to have to get real creative; get public funds to buy pension funds; what will happen to the US bond market?

Fed Advisory Council: steer Fed policy; finally admitted what's going on; how difficult it is for a bunch on con men to come forward and say that they inflated assets; everything you see right now is a bubble; Fed pumping up the market; stock brokers themselves are conned; in the last days there are 2 kinds of people: those who make a lie and those who love a lie; what the Fed admits: current monetary policy is totally ineffective; the Fed has created 0 interest rate policy; they have replaced all free-market fundamentals; displaced all monetary and economic basics; they themselves are the primary driver; How many of you love the fact that you have a privately-held central bank that is the only driving force of your house of cards? Of the economy? The banks are in crisis every single day because of what the Fed has done; chief driver of your economy; how can there be any proper valuations of any equity positions when you have a central bank that is the primary driver of your economy and markets? The Fed is admitting it; the Fed can't withdraw; if they did withdraw now it would cause a massive contraction the likes of which would make the '29 crash look like a Sunday school picnic;

May 2013 the housing bubble; some of you are getting conned because you think it's a good time to buy a house; they're going to artificially try to stimulate the housing market (buy-backs of mortgage-backed securities (MBS)); the punchbowl that got us into the mess we're in is back in the party; people in the market are so in a drunken stupor they don't even realize that the very thing that poisoned the well is this; Fed has been buying \$45B/month in MBS; the Fed is the housing market; the Fed has taken the role of a mortgage lender; Fed is running your stock market; group of con men also driving the 'housing recovery,' American savings lowest in 10 years; 11% increase in value of your house → start to think you have wealth again (you have nothing; a bubble); explain to me how this works out in the end? It ends in a massive, massive crash; we're heading for a bail-in just like Cypress

Steve: when you put your money in the bank, they basically own your money; the entire system is fraudulent; the middle class is being systematically wiped out; "quantitative infinity": money never hits Main St, just hits Wall St; they're not happy with some of your money, they want it all; the useless eaters are going to be denied healthcare, edible food; the great culling is underway; if you use the word "retirement" you've not understood one word he or V has said; you must become almost a hunter-warrior; biblical finance; rental real estate exist in hot markets; how rental properties derive their income

What are you going to do with all your rentals? V's in the northeast; who's going to rent from you when this thing comes crashing down? Nobody; almost as fickle as the tourist industry; non-existent rental market in Detroit, Detroit is a model of what's going to happen to the rest of this country

derivative market: financial weapon of mass destruction; derivatives allow banksters to rig the market, rob and pillage and have zero liability or accountability; so complex; created with sole intent to circumvent political, judicial and regulatory systems/accountability; can rob equity markets on a whim; Marc Faber is absolutely right: every single equity is in trouble; you're in trouble; Buffet cashed out \$49B last week; Soros divested 80% of his stock holdings; snake-oil salesmen

it's not the speculators that are making things go up; the dollar is going down; the world is facing economic slowdown; oil is the lifeblood of any economy; Americans are depleting their savings because they're no jobs; (sounds like he lives in/near NY); value of currency has dropped (purchasing power); Japan will trigger a currency war; US will be on a race to the bottom: you're on that racetrack (everything you own, everything is affected by what you purchase on that track); this is the great crash; we're headed to a special model; the banksters have something very special planned for you  
Americans: stagflation

Steve: Howard Ruff coined stagflation: stagnant economy due to loss of purchasing power of US dollar (things cost more); US currency is a joke around the world if it weren't for central banks given \$100B/month to, if they didn't have the ability to exchange the dollars they take at the central bank level, no one would take dollars; this is engineered: everything happens when they want it to, nothing by chance; you're going to become enemies of the state; they're going to come for you; DSM-5 psychiatric manual: force drugs onto your children; stand up and fight for your children and grandchildren; there is power in corporate repentance, corporate prayer and corporate intercession; when you expose specific operations (that are underway) they're immediately cancelled; the mainstream church is not the place to find Jesus; the food of the flesh is right now what controls the body of Christ; the discerning of spirit you can't do on your own; seek God first; God told V to contact Steve; nothing travels faster than gossip, slander, clamor on earth; liars attach the truth on a personal level

A conspiracy theorist? We've called what's happening in the market to a tea every single time; that's not a conspiracy, that's someone who can analyze an agenda; do you have any idea how much it takes for a con man to come forward?; they're going to rob you blind; they're going to take everything you have, leave you destitute and poor and wipe you out; there is no comparison between Japan & Greece; when the 2<sup>nd</sup> largest bond market and the 3<sup>rd</sup> largest economy has a major problem, we have a problem; (Japan) they're holding a great deal of our debt; Paul Krugman: Nobel laureate, admitted drug addict, clinically insane; investors are bailing out because 10-year government bonds only yielding 0.8% and central bank has 2% inflation target; BOJ is the main player in the Japanese bond, equities and real estate markets; Japan has the same problem we have; investors now coming in to short the market; Japan will lose this battle

Hour 2 (10-11pm)

Japan's lost decade: stagnant economy, deflationary in nature; inflate their way out of it (typical Keynesian playbook); when a central bank play too key of a pivotal role in the market prices and valuation get distorted; Kansas City Exchange: \$2.5B they have problems accounting for (real number: ~ \$7B), 3<sup>rd</sup> largest exchange in the US; much worse conditions with larger exchanges; Keynesians feel they can inflate their way out of this problem; Japan is going to go belly-up; guess who's holding Japanese bonds as well? JP Morgan, BOA, CitiGroup, HSBC; they'll be in bigger trouble

Steve: deindustrialization of America; NAFTA (1993): sink the US economy and shift efforts to China; when they're through picking your pockets they'll pick your bones; Supreme Court just ruled that your DNA is not your own; they want your entire genetic code uncovered; these are the people controlling the world; make you dependent on them; all control of money leads to control of people; they want you dead; they want to divest the planet of 5.5B people; Rothschilds vs. Rockefeller; we're at war; total devastation; vapor assets: dissipates as it rises

Some of you think you have a retirement, a pension, everything will be fine; Jack Lew, US Treasury Secretary (the “strikeout artist”), total failure, joke; July 2013: they will begin to start raiding Federal pension funds; they’re not going to stop: will go into private pension funds, 401(k); V used to say years ago that you’re 401(k) will become a 101(k); now: you’re 401(k) will be vaporized alongside pension, Roth IRA; Cypress-style financial decapitation on your bank accounts; Canadian central banks have said the same thing; you are what’s for dinner (your savings, pension, childrens’ future); hoping that you all have the courage, the conviction and the wherewithal to rubber the road and do what needs to be done because nobody else is going to do it for you; [guerrillaeconomist@gmail.com](mailto:guerrillaeconomist@gmail.com); will show you what the elites do to hedge themselves; dollar is the currency that’s going to go bye-bye; 50% of the biggest economies of the world have already set-up currency exchanges and swaps to move away from the dollar; world’s economies are moving away from the dollar; real wealth is gold, silver, precious metals; this is what they use as collateral, exchange; forget the price: if it’s high, buy it; if it’s low, buy it; BUY BUY BUY; with gold & silver being at the price they are today: there are no sellers; nobody is selling, everybody is buying and holding; acquisition premiums; you need to get out now of gold & silver ETFs; JP Morgan’s current silver holdings in their vaults: < 150k oz

Steve: US Mint raised the premium on fractional gold by 40%; those who have sold out of their IRAs, 401(k)s are coming out ahead; cold fusion needs platinum and palladium; platinum and palladium markets are so thin; earth is shifting (moving under your feet); magnetic pole changing at an accelerated rate; there is no such thing as retirement

World Bank whistleblower Hudes (sp?) will fall on deaf ears; the dollar is done; it’s already being devalued; too little, too late; V is a New Yorker; if you’re thinking retirement, you’re retarded; V wants to see that you’re hard-earned money is preserved; taking something that’s in an exchange and get real wealth into your hands, understand what the elites are doing; true preservation of wealth; great ways to get your portfolio diversified: platinum and palladium; turmoil in markets have created massive buying opportunity; understand what real wealth is about (something tangible); giving that control back to you; we’re giving you power; we’re empowering you power over your own wealth; only way to protect yourself, that’s how you check out of the system (you circumvent it); V would rather risk having gold & silver in his own house vs. having money in a bank somewhere that he can’t touch; when you put your money in a bank the lending rules say you’re no longer a depositor, you’re a creditor to the bank; the bank takes your money and loans it out 9x (fractional reserve lending); FDIC will pay you back anywhere from 0 – 99 years; they never will pay you back;

Once the bond market goes bust and the economy crashes; raiding pension funds; forcing people to buy government bonds; they’ve got to keep the Ponzie scheme going (running out of suckers); if that doesn’t shatter your paradyme then folks you’re already dead; there’s no hope for you

Steve: they need more pockets to pick; NLP programming via mass media; Gerald Celente has been telling the truth;

Global elimination of every single exchange; they will shut it down on a Friday, on an afternoon, before lunch; going to crash, failsafes will hit, everybody goes to lunch, nobody comes back to work; this is the end of all things; this is worse than you can ever imagine; 1929: no derivatives, CDOs, CDS, interest rate swaps; > \$600T - \$1.5Q debt (w/derivatives); valuation problem; 400% insider trading; we’re infinitely worse than ’29; this crash is to set-up a new monetary system; they’re going to rob you; bail-in policy; complete wasteland; which is old is going to be done away with and replaced with which is new

V needs a good snapshot of what you’re going through before he gives you his prognosis; keep in the bank what you need to pay your day-to-day bills, the rest in precious metals (depending on your assets and liabilities, cash flow, income, expenditures)

Steve: lives on his computer screen until he nods off; when he talks to traders; how many mouths of witnesses does every word need to be established?; Lindsey Williams is saying the same things; platinum is used for chemical reactions; elite have held secret knowledge, hidden knowledge, ancient technology, all the truths of real history in order to twist, control and utilize it at their venture; money is the sum of your or someone else’s effort; the purpose of being blessed is to be able to help others; it’s not enough to raise yourself up; money is a spiritual thing; when something is precious, you value it; if you deal with brokers you’ll end up that way; making your gullible and susceptible to having your pockets picked; you will

invest in the bonds; if you're a Bible-believing Christian, loving Jesus, you will not be able to function in the system that they are bringing upon the scene; black/free market based on barter; basis of all international banking is to give you paper and steal your stuff

When you peel back the veneer of the false reality that many people live under, some people just don't know how to take it; you've got to be able to compartmentalize it; go about your work but be mindful of what's going on around you; live your life but be aware of the forces at play; government wants to manage all of the private retirement accounts; just about every facet of this economy is infiltrated; it's imperative to have the proper perspective: precious metals is the only way to circumvent what is to come and what is going to happen very soon; you don't have much time; middle of the year: July 3, 2013 kickoff, 10-month window ends in October; unprecedented events; there's no economic growth; real inflation (currency manipulation, rise of energy and food prices); economy has contracted: Americans trying to keep up with their bills

Hour 3 (11pm-12am)

Steve: Is Dave Ramsey from the establishment? Where would you be if you followed his advice?

V doesn't live too far from Joe & Doug...today, when you're facing financial armageddon, the loss of everything you have, you cannot afford to listen to a guy like this; paying off your debt is important; Ramsey doesn't have the knowledge or education to deal with this monumental issue; they want total control of your retirement accounts (they want the government to manage it); you're about to lose everything; the economy is contracting; we're headed for stagflation; Dave Ramsey's a one-trick pony; when you lose it all don't say I didn't warn you

Steve: there's nothing that's overtaking us in any realm that God's word hasn't already addressed; we're sounding the trumpet; the track records speak for themselves; the testimony of Jesus is the spirit of prophesy

The way the market is right now I cannot guarantee the safety of client funds; that's why I'm telling people to get out; there's no safety anymore; I'm going this because the Lord is warning me; don't wait for your boat to come in, begin to build an ark; we're trying to get you guys to build an ark; in the coming weeks we're going to try and structure your ark in such a way so that we can close the door; the Lord will lead you through the storm; Steve is 20 years ahead of the nation; you have a clear picture; cast off all confusion, doubt; God is the author of order and peace; he's put certain people in your life to give you a warning to let you know time is short, this is not a cycle, it's not business as usual; prepare for what's ahead

Once a crash does happen, how long is the fiat currency going to last? Not going to buy you much of anything; gas in a day or 2: \$7 - \$10/gallon; ability for goods to move will cease; food prices will increase; \$10k in sock drawer will last you a couple of weeks at the most; keep what you need to pay the bills; in hyperinflationary environment, your \$10k isn't going to be worth \$0.10

One of V's insiders: mid-level guys in cahoots will begin to move out within 2 weeks before any major crash occurs; they have their safe houses; people like Diamonds, Blankfinds, Pandants; they're going to kill the dollar; Jack Lew is a strike-out artist, loves to fail, will do the bidding of the banksters

0b@m@care: "Osamacare;" picture a boat, the U.S.S. Economy; multiple torpedos to sink this ship: 1) stock market w/all bubbles in equities; 2) GDP debt; 3) total stagnation of economy and a contracting economy; 4) unfunded liabilities; 5) 0b@m@care, the nail in the coffin; main purpose is the destroy small business; written by the insurance agencies; you do not have a free market system in this country anymore; you don't have capitalism, you have cartelism (3 – 5 companies that control everything); crony capitalism; designed to desimate small business; the next economy: the rest of us will all be serfs

Hindenberg Moments: Federal Reserve Advisory Committee admitting they've lost control; Japanese admitting they've lost control of bond market; artificial suppression of metals; false sense of security;

Continue to watch: bond sell-offs in US; government maneuvering in pension funds; positioning of government managing of private pension funds; massive conflagration in Middle East; we are a hair-trigger away for multiple Black Swans taking place;

Steve: the elite always have to tell everyone what they're going to do; showing us how dumb we are; main problems facing Christians: ignorance, apathy, indifference, false teaching; that what we're seeing going on in the natural is really being orchestrated in the supernatural; your mortgage is most likely owned by Arab or Chinese confederacy; when this thing goes, they'll be coming to 'collect the rent' (coming to take what's rightfully theirs (a spoil)); everything you think you have on paper that represents something you think you have is nothing but an illusion of electrons; when everybody rushes for the door at the same time they can't get out; you want to be where everyone isn't; you're going to put your money in our banks and we're going to take it from you; Steve watches the premiums rising; cash value represents real value vs. spot price which indicates manipulated prices; US Mint has monetized gold at \$2k; you don't want to be there because the creditors will always follow the caravan; when the sheep panic, the wolves are sitting there salivating; we are seeing full-scale warfare; most people do not see the lateness of the hour

V is working on putting together a Web site; will give us the strategies that the elites use; (sounds like he's in NY); who can deliver?

## **Enter The Dragon's Den: China's Strategic Gold Swipe**

June 12, 2013

For over a decade we have been hearing about the term consolidation in the PM market. That once this occurs you can see the price of Gold and Silver skyrocket. Year after year those fixated on the paper supply side of ETF's and futures contracts have seen the PMs go up and down in a wild range of spot price, that calling a bottom or a top is fool hearty. While the vast majority dedicated their energies to the fight of PM vs the Fiat of the world, there has been an operation at work so insidious so diabolically genius that until recently the magnitude of the operation was virtually unknown.

My first inclination of this beginning happened when I was a lowly commodity broker facilitating the very specialized market of strategic metals for a large European firm doing business in NYC. My job was to be involved in every aspect of the deal for my direct clients. This involved dealing with the workers of the mines in Zimbabwe, to the shipping of the ORE and Ingot from South Africa to the Netherlands where the wares are refined and readied to be sold to customers the world over. During this time we started coming in contact at every level from Chinese nationals. I have seen first hand the way they come in. Not like us Westerners, they do not come to African or Developing nations with the intent to control and pilfer their resources. No they come to create mutually beneficial partnerships that work in the favor of both countries. What a revolutionary concept! This became the reason why wherever China goes in the developing world, they are more than willing to do business with the her. Her business men and investors help build roads and much needed infrastructure, they bring resources to bear that help the indigenous population much need food, medicine and education. In return the host countries throw out the red carpet for China. So you really can attract more flies with honey.

The most empirical evidence for this is the staggering level of business that China does with the Middle East and North Africa. So what is America's response to this? Well Gunboat Diplomacy of course. What China brings in aid and infrastructure, we come with hubris and machinations of regional dominance. China helps with oil discovery, we bomb, China creates opportunities for the indigenous populations, we give them sanctions. China seeks business partnerships with every nation but alliances with none. We bully and threaten and sow discord. China invests in Africa, what do we do? We militarize and destabilize with AFRICOM. In other words we are the total failures of a archaic foreign policy written by men who have no concept of how the world works today. A limited, short sighted policy of contention and containment geared for fighting soviets but obsolete in dealing with the current high speed economic-multidimensionalism. We are the old fuel swigging raucous 1960's muscle car, in an era of high speed modern exotics. It is a game that we are losing.

This brings us to the main issue, we know that Gold is not only the wealth preserver but it is the ACE in the sleeve, the trump card against the forces of Fiat currencies and the Central Banking Concept. The nation that posses the most will be the one left standing when the dust of the once mighty Anglo-American Banking System finally crashes into the dustbin of history. Since the devaluation of Gold and Silver in April, the effect had a few things going for it:

1. It drove enough fear into the hearts of the weak handed, causing them to dump what they have into the steel jaws of the jackals of finance.
2. It drove the short sighted, short term profiting Speculator out of the market. Leaving more for the Jackals of Finance.
3. It drove up acquisition premiums
4. Finally it created a buying spree the likes of which the world has never seen with Asia, particularly China and India being at the forefront.

Today we are at a juncture that in light of "low" spot price of PM's there is no one selling and everyone is buying. Further putting a choke hold on the Ponzi schemes run by Goldman Sachs, JPM, the Fed and COMMEX. All of the just mentioned characters either have no PM in the vaults (COMMEX and NY FED) or there is not sufficient metals to meet contractual futures obligations (COMMEX, JPM, GS) Which will lead these cronies to default. This mad buying has caused many sovereigns to do things that are considered irrational . China for instance in the last decade has set up various Sovereign Wealth Funds through which they are purchasing vast stores of PM from the Bullion Banks themselves. The Main monster in this den of Dragons is the Sovereign Wealth Fund CIC ( China Investment Corp) an almost half a trillion dollar monster whose sole purpose was to consume worthless US dollars, and use them to buy valuable assets.

This past week we have heard that Swiss refiners delays have reached 5 weeks. How and why? After much careful digging it seem that the Chinese are heading the train off at the pass and purchasing Gold Ingots at point of manufacture paying more than what a refiner would pay. Once again adding a quiver to the long list of strategic metals and rare earth mineral mines, China is cornering the market on Gold. People tend to forget also the vast wealth the China always had in Gold from it's historic dynasties. This was confirmed by Steve Quayle's top level Chinese source. It was said to Mr. Quayle that the vast wealth of Ghengis, Kubla, Hahn and Ming Dynasties have all been preserved and stored from the prying hands of Western Imperialists for hundreds of years.

Consider that China has a mysterious "Shadow Banking" cartel that is as secretive as anything in the west and one begins to see a clear picture of how this machine works in light of current economic malaise. A slowing economy, labor issues, and currency wars has not stopped the ravenous buying of Gold by the Chinese. This can only be done by the massive wealth within the Shadow Banking sector as well as the vast stores of US dollars. So kill two birds with one stone, with the Dollar buy up some Gold at the same time help bring down the US, A perfect plot if I do say so myself.

CIC moves the gold, in other words it "Launders" it. This way it shows nothing on it's books and only very little holdings at any given time. Giving the impression of innocuous innocence. Pretty amazing for a firm that is the largest handler in the world of foreign exchange reserves. There is no better way to spend all of the worthless Federal Reserve Notes than in precious metals.

So what does that mean for us? Well once again proof emerges that American is being raped, robbed and pillaged. We have five mints in the Country and 6 or 7 major dealers. It is only a matter of time before a Chinese national with a well rehearsed West Texas accent begins to call these places and make an offer that they can't refuse, \$100 - \$200 over spot? Folks we have in this country about 600,000 and 800,000 oz of gold

left. In the grand scheme of things that is peanuts. In a massive emergency run in gold the supplies would last three weeks at the most!!!

Please the time to be sitting on the fence is over get off the fence or you will be impaled by your lack of taking action. Be prepared. COPYRIGHT-www.stevequayle .com -MAY BE REPRODUCED IN ITS ENTIRETY AS LONG AS LINK IS INCLUDED to [stevequayle.com](http://stevequayle.com)-ALL RIGHTS RESERVED
